ISL Trunking

S/N: HT000025214

IBM P/N: 45W0266

ID: 45W0266HT000025214

Printed in the USA

**Instructions for enabling the ISL Trunking feature (Keep this as a record for future use).**

1. Obtain the license ID of the IBM switch, using one of the following methods and write it in the space provided. The license ID is the same as the World Wide Name (WWN).
  - GUI: If Brocade Advanced Web Tools™ is enabled, connect to the switch using a Web browser. Log in as the admin and enter your switch password. Using Brocade Fabric OS v6.1.x or later, click the **Switch View** button beneath the switch graphic. The license ID of the switch displays on the Switch Information view.
  - CLI: Connect to the switch from a command prompt using **telnet switchipaddr** command. Log in as admin and enter your switch password. Enter the **licenseidshow** command to display the license ID of the switch.
  - The WWN is in the form 10:00:xx:xx:xx:xx:xx:xx, where xx values are unique to each switch.
2. Enter the following URL in your Web browser: [www.ibm.com/storage/key](http://www.ibm.com/storage/key)
3. Enter your email address, license ID, and the Transaction Key. Note that the license ID should be entered into the World Wide Name field.

**WWN/License ID:** \_\_\_\_\_

This *case-sensitive* Transaction Key is to be used only once to acquire a feature activation key. The feature activation key enables this feature on one switch only. Keep a record of this Transaction Key for future use on this switch, if necessary.

*Please note the valid character set for transaction keys only include A,B,C,D,E,F and the numerals 0,1,2,3,4,5,6,7,8,9.*

*This transaction key can only activate a feature on one unit and should not be used on any other units.*

**Transaction Key:**                      **08DC40A17D3DDB0407DCE0**

**Feature Activation Key:** \_\_\_\_\_

4. Write the feature activation key in the space provided, for future reference.
5. To enable the licensed feature, log in as admin and enter the **licenseAdd** command. Detailed instructions for activating your key are given on the Web page with your feature activation key.
6. Attach the white stick-on label to the top of the switch. This label alerts you, the customer, to reinstall this feature in the event a switch replacement is required.
7. **NOTE:** If you require additional assistance, please contact your local IBM service provider.
