© Inter IKEA Systems B.V. 2009

The advertisement features several circular buttons with the following text: "Reduce Reuse Recycle", "WORK WITH US", "to gether ness", "Save Water. Shower together", "everyone deserves good design", and a button with a red lamp. The IKEA logo is in the bottom left corner.

# Section 1 Introduction

Outlook 2010 is a powerful Information management application that allows you to co-ordinate projects using a variety of different tools. These range from E-mail for communication, to the Calendar, which can be used for time management. Tasks to manage your workload and notes to stop you forgetting important bits of information, Finally contacts to keep a track of all the people you need to incorporate into your busy schedule either by phone, email projects, mailings or social connections.

## How To Use This Guide

This manual should be used as a point of reference following attendance of the Outlook '2010 training course. It covers all the topics taught and aims to act as a support aid for any tasks carried out by the user after the course.

The manual is divided into sections, each section covering an aspect of the course. The table of contents lists the page numbers of each section and the table of figures indicates the pages containing tables and diagrams.

## Objectives

Sections begin with a list of objectives each with its own check box so that you can mark off those topics that you are familiar with following the training.

## Instructions

Those who have already used a similar application before may not need to read explanations on what each command does, but would rather skip straight to the instructions to find out how to do it. Look out for the hand icon  which precedes a list of instructions.

## Keyboard

Keys are referred to throughout the manual in the following way:

[ENTER] – denotes the return or enter key, [DELETE] – denotes the Delete key and so on.

Where a command requires two keys to be pressed, the manual displays this as follows:

[CTRL][P] – this means press the letter “p” while holding down the Control key.

## Commands

When a command is referred to in the manual, the following distinctions have been made:

When ribbon commands are referred to, the manual will refer you to the ribbon – “Choose **MESSAGE** ribbon and then **BASIC TEXT** group and then the command”.

## Notes

Within each section, any items that need further explanation or extra attention devoted to them are denoted by shading. For example:

*“Outlook will not let you close a mail message that you haven’t already saved without prompting you to save.”*

# Section 2    Understanding Outlook 2010

## Objectives:

### **BY THE END OF THIS SECTION YOU WILL BE ABLE TO:**

- Understand The Uses Of Microsoft Outlook
- Get Started
- Recognise Outlook Screen Elements
- Access Help

## What is Microsoft Outlook 2010?

Outlook '2010 is an information management application that helps the user to co-ordinate messages, calendar activities, contacts and tasks. It comprises a mailbox, a calendar, a contact list, notes and a journal. Outlook is designed for both stand-alone computers and personal computer networks. If the user is connected to a network they can share their information with others.

Outlook comes with a transport application known as Exchange. A transport application enables the flow of information and must be installed to use Outlook's e-mail feature. E-mail is sent in and out of mailboxes in the same way as physical mail goes through a postal service. Mailboxes can be set up for individual users or for multiple users. All networked users with mail accounts can share information by using Outlook and a transport application such as Exchange.

## Getting Started With Outlook 2010

When Outlook 2010 is installed, the Setup program looks for the user's user profile. A user profile is a group of settings that define the setup of Outlook for a particular user. Only one user profile is needed to access Outlook, however, multiple user profiles can be set up each with their own unique settings,

E.G. if there is more than one person using Outlook, each user should have their own user profile set up. The user's administrator usually creates user profiles.

When setting up user profiles, certain information services can be included. An information service is a group of settings that enables the user to send, store and receive messages and items, and indicates where to store addresses,

E.G. in a Personal Address Book.

## Logging On

When Outlook 2010 is launched, depending on the configuration, the user may be asked to enter a password.

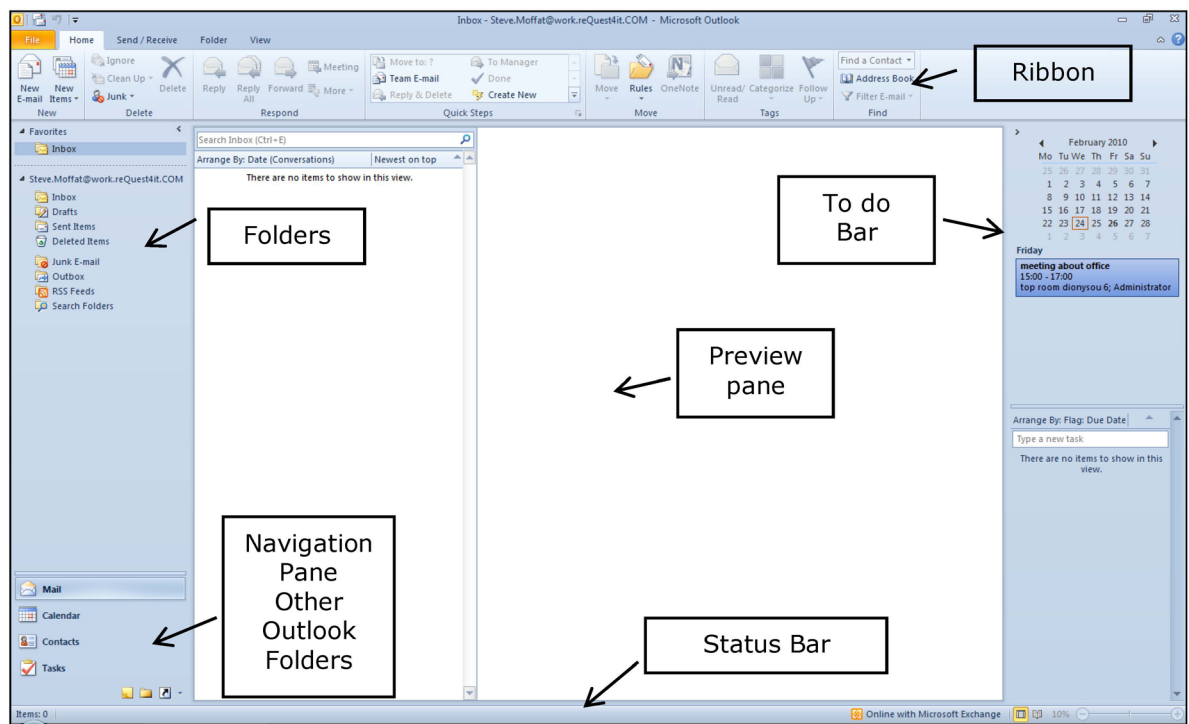

➤ **To Enter A Password:**

### **KEYBOARD**

1. Type the relevant password
2. Press [ENTER]
3. Outlook is started with the users identity on the top of their mailbox on the left.

## The Outlook 2010 Screen

When Outlook 2010 is first started, the user is presented with the following screen:

## Title Bar And Buttons

The Title Bar appears at the top of the Outlook window, registering the title of the application the selected Outlook folder and the user, (if connected to exchange). When the Outlook window is not maximised, you are able, by positioning the mouse over the title bar and clicking and dragging, to move the window to a new location on the screen.

## Maximise Button

When working in Outlook, the Outlook screen may not be a full size window. If you would like the window that your Outlook application is in to fill up the whole screen, click the outermost maximise button.

## Minimise Button

This button is very useful if you need to temporarily switch from Outlook into another application without closing Outlook down completely. Click the minimise button to shrink Outlook to an icon on the task bar; you will then be able to view other icons and applications you may wish to access. When you are finished and ready to continue, click the Outlook icon from the task bar to resume.

### Restore Button

This button only appears when a window is maximised. A maximised window has no border and you cannot see what is behind it. If you want to put the window back inside its border so that you can move and size it, click the restore button.

### Close Button

This button is used to close a window. If you click the close button it will close the Outlook application.

### Menus

Menu's are no longer used in Outlook they have been replaced by Ribbons and will be referred to as such throughout the manual

com

## Ribbons

Ribbons are tabs that show different commands with respect to what you wish to do the **HOME** ribbon shows basic commands of email.

The send and receiver ribbon gives commands on sending your emails remember outlook may be used with exchange, POP email and Dial-up as a few examples. Just click on any named ribbon to see list of commands that you can perform by clicking on the appropriate icon.

The commands on the ribbons will change depending on whether you are in mail, calendar, tasks etc.

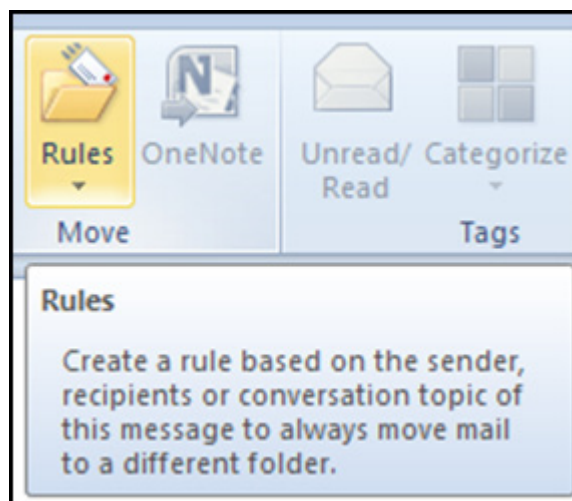

Any Icon on the ribbon with a down arrow offers other options and sometimes a dialog box.

**E.G.** Choosing **QUICK PARTS** in the **TEXT** group allows you to insert a field within your document or a document property adding information to your document that can be updated as the information is changed at source.

## Backstage View

The **FILE RIBBON** is the “tools” of Outlook and has many important commands and options. Such as Outlook settings, opening, saving, printing and closing items. This will be looked into much further later in the manual.

## Screentips

Screentips are helpful hints that appear, to guide your choice to which command you may wish to apply. These can be useful when locating unfamiliar buttons or commands.

➤ **To View Screentips**

**MOUSE**

1. By holding your mouse over an icon, a helpful hint will appear to show you what that command will do.
2. Clicking will apply that command

**Dialog Box**

Look at a group type on the ribbon in an email such as **FONT** and in the bottom right hand corner of that group you may see a small box with an arrow, this is the **DIALOG BOX LAUNCHER** clicking this is a method to call up a dialog box when the dialog box is open, make a choice from the various options and click **OK** at the bottom of the dialog box.

If you wish to change your mind and close the dialog box without making a choice then click on **CANCEL**. The dialog box will close without any choice being applied. If you would like help while the dialog box is open then click on the “?” in the top right hand corner this will bring up a help window that will display the relevant topics. Many dialog boxes may be more familiar if you have used Word before.

**Toolbars**

There are **ONLY TWO** toolbars within the new version of Outlook 2010 there is the **QUICK ACCESS TOOLBAR** seen here above the **FILE TAB**, and there is the **MINI TOOLBAR**

## Quick Access Toolbar

By default there are only two buttons on the **QUICK ACCESS TOOLBAR** in Outlook but these can be edited and other regularly used buttons can be placed there. Using the drop down menu next to the **QUICK ACCESS TOOLBAR** will allow the customisation of this toolbar adding your most often used commands.

### ➤ To Add A Button To Quick Access Toolbar

#### MOUSE

1. Click on drop down customisation menu for toolbar
2. Select a button to add (let's say the **NEW** button) the **NEW** button appears in **QUICK ACCESS** toolbar

## Mini Toolbar

Whenever text is selected within an email a small formatting toolbar will appear above the highlighted text it will disappear if the mouse cursor is moved away from the toolbar and will reappear when the mouse cursor is moved over the highlighted text again.

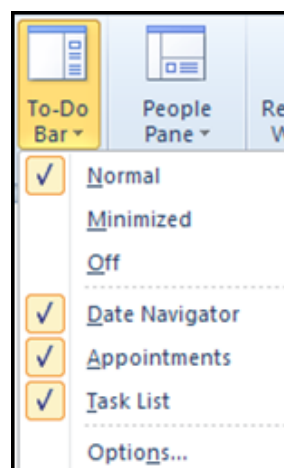

## Status Bar

The Status bar, across the bottom of the screen, displays different information at different times. To the right of the status bar are firstly, the different views that can be used within Outlook, and on the far right, the zoom control

## To Do Bar

The To Do Bar is a pane on the right that allows you to quickly see appointments, tasks and a small calendar to allow you to organise yourself quickly and easily. Showing upcoming appointments and tasks. It quickly allows you to create new tasks and see flagged emails (emails marked for action).no matter where they are within your mailbox.

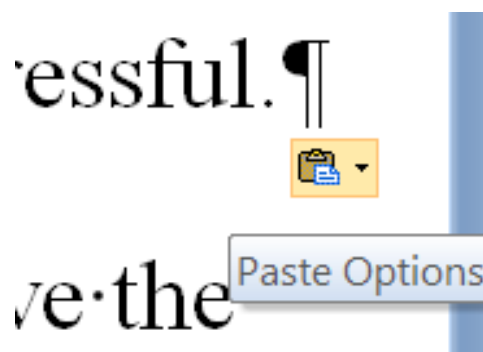

You are able to minimise or turn features on or off for this bar by going to the view ribbon and selecting the drop down arrow on the to do bar.

Untick an item to hide it or tick to enable the feature.

## Smart Tags

Smart Tags, first introduced in Microsoft Office XP, make it easier for you to complete some of the most common tasks and provide you with more control over automatic features. Word can recognise a wide range of different data types entered into a document, such as dates, addresses and stock ticker symbols. It converts each recognised piece of data into a smart tag, and you can then use a menu attached to the smart tag to perform useful actions on that data. Before you start using smart tags, you need to check if smart tags are enabled and specific smart tag recognisers are also activated.

- *You do not have to complete any additional steps to make the Smart Tags appear or disappear in Word.*

**E.G.** The **PASTE OPTIONS** smart tag appears automatically after pasting to allow you to quickly choose actions and remain in place until you begin another action. When you complete a paste operation, the **PASTE OPTIONS** button remains in place alongside your text until you begin typing new text.

This feature alerts you via a smart Tag of the paste options when pasting text into your email Click on the drop down arrow to access the options

- *If you type any character the smart tag will no longer be available and will disappear*

## Scrollbars

The Scrollbars are located along the right and bottom of the object window. They enable you to see other parts of hidden text or hidden emails by dragging the box or clicking the arrows in the scroll bar.

## Viewing Information In Outlook

### Items

Each type of information that Outlook manages is stored in a separate Outlook folder. A particular piece of information stored in an Outlook folder is known as an item, for example, an e-mail message stored in Inbox folder, an appointment stored in Calendar folder etc. As explained later on in the manual, you can also create one or more additional folders to store each information type. The table Below lists the function and the type of information stored in each of the default Outlook folders that Outlook initially sets up.

Default Outlook Folder	Description
<b>Outlook Today</b>	Enables the user to keep track of your appointments and tasks in one window along with keeping you informed of the e-mail you have.
<b>Inbox</b>	Receives your incoming messages, enabling the user to send and receive messages.
<b>Calendar</b>	Enables the user to schedule appointments and events.
<b>Contacts</b>	Enables the user to enter and keep track of business and personal contacts.
<b>Tasks</b>	Enables the user to create and manage tasks.
<b>Journal</b>	Records all items as they occur, such as accessing an office file, sending an e-mail message
<b>Notes</b>	Electronic “sticky notes”, storing text information that enables the user to quickly record reminders.
<b>Deleted items</b>	Contains any items that the user deletes in Outlook before they are permanently deleted.
<b>Sent Items</b>	Keeps copies of messages that have been sent by the user.
<b>Outbox</b>	Temporarily contains message that the user sends until they are delivered.
<b>Drafts</b>	Stores incomplete messages enabling the user to go back to them to complete and send later on.

### View Area

To view and work with the items of information stored in a particular folder, you need to open that folder. Outlook will then display the folder’s items in the View pane of the Outlook window and the Outlook ribbon command buttons will change to provide the commands you need to manage the type of information kept in that folder.

### Navigation Pane

The Navigation Pane on the left allows you to access the other data stores or folders in Outlook, such as the calendar, tasks etc. You can drag a folder such as inbox to the favourites section of the navigation pane if you have many mail folders this will enable quick access to your inbox no matter which folder you happen to be in.

➤ **To Access A Different Folder Type**

**MOUSE**

1. Click on the folder type you wish to access such as calendar you will then notice your calendar appear in the main view pane.
2. If you have more than one calendar in your mailbox select the calendar you wish to view in the navigation pane for it to appear in the main view area.

**Outlook Shortcuts**

One of the fastest ways to open an Outlook folder is to use Shortcuts. Users can add shortcut groups that quickly open their favourite and most frequently used folders. The user can add, remove or change the size of the shortcuts. The Shortcuts section in the Navigation pane can be divided into groups to help organise the user's information. These groups contain related shortcuts. Users can also create their own groups.

With us you can  
shape the future.  
Every single day.

For more information go to:  
[www.eon-career.com](http://www.eon-career.com)

Your energy shapes the future.

**e-on**

➤ **To Switch To Shortcuts:**

**MOUSE**

1. Click the **SHORTCUTS** icon at the bottom of the **NAVIGATION PANE**. The Shortcuts may be one of the minimised icons.
2. The **NAVIGATION PANE** will display hyperlinks allowing you to set up a shortcut to a particular item, file, or web page.

**KEYBOARD**

3. Press [CTRL] 7

➤ **To Create An Item That Includes A Shortcut To Another Outlook Item:**

**MOUSE**

1. Use the right mouse button to click on the item that you want to create a shortcut for, and drag it to the folder where you want to create the new item.
2. Release the mouse button, and, from the pop-up menu that appears, choose **COPY HERE AS <TYPE OF NEW ITEM> WITH SHORTCUT**.

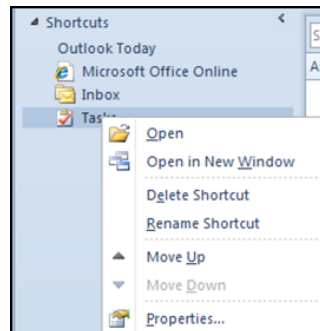

➤ **To Create A Hyerlink To A Website In Your Shortcuts**

**MOUSE**

1. Open up the web page you wish to create a shortcut to.
2. Go to shortcuts in the navigation pane.
3. Arrange windows so you can drag the icon next to the web address in internet explorer to the shortcuts in outlook.
4. Simply drag and drop as described ensuring you selected the icon to the web address.
5. The web should be either on the internet/ intranet or a file you are capable of accessing from other machines if on the network.
  - *If the Navigation pane is not displayed, choose the **View, NavigationPane** command from the Ribbon.*

➤ **To Remove A Shortcut:**

**MOUSE**

6. Right-click on the shortcut and choose Delete shortcut from the menu

➤ **To Reorder A Shortcut:**

**MOUSE**

1. Click and drag the shortcut required to a new location in the Navigation Pane.
2. Release the mouse.

**OR**

1. Right click on the shortcut and choose move up or move down.
2. Repeat as needed

## Previewing Items

You can view the contents of an Outlook item without having to open it in a form.

### Autopreview

 eddie.holder@f...								None
Year	Qtr	Catalog No	Channel	Category	Publisher	Units	Sales	
1998	1	41210	Domestic	Drama	Penguin	30,922.00	310,755.00	
1999	2	30782	Domestic	Tragedy	Mc Millan	26,151.00	371,831.00	

AutoPreview allows you to see the first few lines of a message in the main Outlook view window.

➤ To Use Autopreview

MOUSE

On the **VIEW**tab, click **CHANGE VIEW** then the **PREVIEW** icon from the displayed choices.

To hide the AutoPreview, On the **VIEW**tab click **RESET VIEW**.

## Reading Pane

When in a mail folder a reading pane can be turned on (On by Default) or off to allow you to see the contents of an email just by selecting it in the view area. Using your down cursor key you can quickly “view” your emails and move on to the next without having to constantly reach for your mouse. You may turn the reading pane on or off (or have it at the bottom of the screen instead of the right)

You can set options to determine how messages are treated when viewed in the Reading Pane – for example, do you want them to appear as read or stay unread.

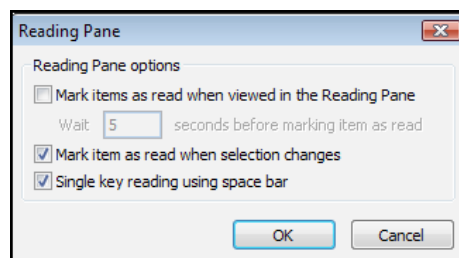

### ➤ To Turn Reading Pane On Or Off

#### MOUSE

1. Go to the **VIEW** tab and click on the **READING PANE** button in the **LAYOUT** group
2. From the displayed choices make a selection and the reading pane will be adjusted
  - *The reading pane is on by default for any folder you create to store emails and will have to be turned off manually for each folder.*

#### TO POSITION THE READING PANE

#### MOUSE

1. Choose the **VIEW** tab, **LAYOUT** group, **READING PANE** button.
2. Choose the Right or Bottom from the sub-menu.

➤ **To Set Reading Pane Options**

**MOUSE**

1. Choose the **VIEW** tab, **LAYOUT** group, **READING PANE** button.
2. Set the options you require and click OK.

## Microsoft Outlook Help

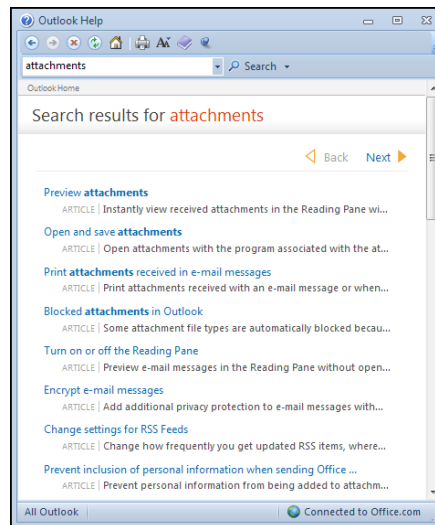

Outlook 2010 offers several ways to get help when performing particular tasks. You can select from a list of topics provided by Help, or you can even type a help request in plain English, and Outlook help will point you to the right location. Most of the help is found in one location.

Outlook 2010 provides a new alternative to using the old assistant,. You can get help by typing a question or phrase in to the Help search Box that you will find by clicking the question mark in the upper-right corner of the application.

➤ **To Access Help**

**MOUSE**

1. Open the help window by clicking on question mark in top right hand corner of the application.
2. Type a question or phrase and click the Search button.
3. Scroll through the topics, if necessary, or by clicking on the hyperlink to the desired topic The help text will be displayed in the Help Window.

# Section 3 Using Folders

## Objectives

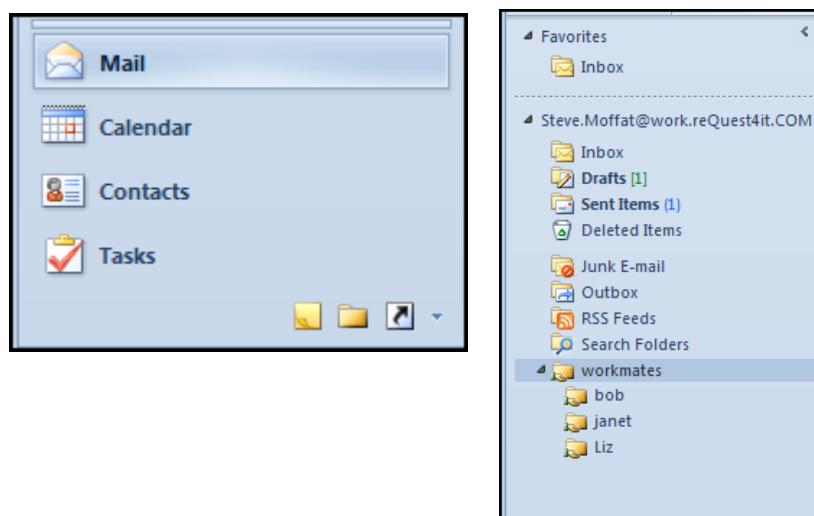

### **BY THE END OF THIS SECTION YOU WILL BE ABLE TO:**

- Understand The Use Of Folders.
- Create And Manage Your Folder List.
- Navigate Within The Navigation Pane.
- Create And Use Favourite Folders.
- Create And Use Public Folders

## What is a Folder

A Folder is a container that holds items within Outlook if you are working with emails then the folders you will use will be email folders. If you are in a calendar you are in a calendar folder which holds items like appointments and meetings. each different kind of folder holds a different kind of item and you cannot store appointments in an email folder and vice versa.

For the most part of this section we will concern ourselves with email folders. ALL folders are contained within your mailbox but within outlook they are filtered when you are in the various sections of Outlook. For instance if you click on the mail section in the navigation pane you will only see folders that can contain email items. If you click on the calendar section. The various calendars you may see ONLY contain calendar items.

## The Folder Ribbon

In earlier versions of Outlook there were folder commands in many different locations but now they have been all brought together in one location on the folder ribbon. Any work we do with folders will be from this tab.

## Creating Folders

Users have the ability to create their own folders for organising and storing information. Subfolders can also be created for additional levels of organisation. Subfolders can be copied and moved within the tree structure.

# Brain power

By 2020, wind could provide one-tenth of our planet's electricity needs. Already today, SKF's innovative know-how is crucial to running a large proportion of the world's wind turbines.

Up to 25 % of the generating costs relate to maintenance. These can be reduced dramatically thanks to our systems for on-line condition monitoring and automatic lubrication. We help make it more economical to create cleaner, cheaper energy out of thin air.

By sharing our experience, expertise, and creativity, industries can boost performance beyond expectations. Therefore we need the best employees who can meet this challenge!

**The Power of Knowledge Engineering**

Plug into The Power of Knowledge Engineering.  
Visit us at [www.skf.com/knowledge](http://www.skf.com/knowledge)

➤ **To Create A New Folder:**

**MENU**

1. Go to the **FOLDER** tab on the ribbon and to the **NEW** group, click on **NEW FOLDER**.
2. In the **NAME** box, type the name for the new folder.
3. In the **FOLDER CONTAINS** box, select the type of items the folder is to contain, e.g. Mail Items (this will be the default.)
4. In the **SELECT WHERE TO PLACE THE FOLDER** box, choose the location for the folder, e.g. Inbox and click **OK**.

**OR**

**MOUSE**

1. Click the right mouse button on the Folder list, choose **NEW FOLDER**.
2. Continue as Previous.

**Renaming A Folder**

➤ **To Rename A Folder:**

**MENU**

1. Select the folder to rename.
2. Go to the **FOLDER** tab on the ribbon and to the **ACTIONS** group, click on **RENAME FOLDER**.
3. Enter new name and press **RETURN**

**OR**

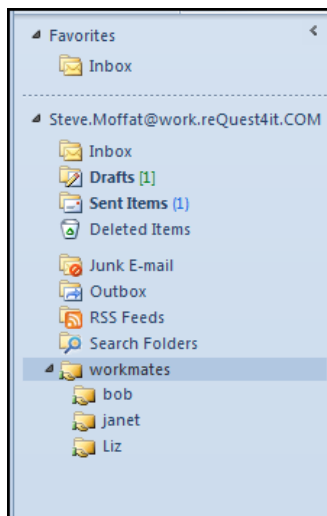

1. Click the right mouse button on the folder to rename, choose Rename Folder.
2. Type new folder name and press **[ENTER]**.

**Expanding And Collapsing A Folder**

If the user has lots of subfolders, the Folders list can become long and lots of scrolling may be needed to find a particular folder. The user can collapse and expand the Folders list and view just the folders required. Expandable folders are indicated by a + symbol displayed next to them. Collapsible folders have a - symbol displayed next to them.

➤ **To Expand A Folder:**

**MOUSE**

1. Click on the little triangular arrow next to a folder to expand the branch

**OR**

1. Double-click on the folder to expand.

➤ **To Collapse A Folder:**

**MOUSE**

1. Click on the little triangular arrow next to a folder to collapse the branch

**OR**

1. Double-click on the folder to collapse.

### Moving And Copying Folders

Folders can be moved or copied within the tree structure.

➤ **To Move A Folder:**

**MENU**

1. Select the folder to move
2. Go to the **FOLDER** tab on the ribbon and to the **ACTIONS** group, click on **MOVE FOLDER**.

**OR**

1. Drag the folder you wish to move and drop it in the folder you wish to move it to.

**OR**

2. Click the right mouse button on the folder you wish to move, choose **MOVE**
3. In the **MOVE FOLDER** box, choose the new location for the folder, e.g. Inbox.
4. Click **OK**. The folder moves to become a subfolder of the folder selected in step.

➤ **To Copy A Folder:**

**MOUSE**

1. Select the folder to copy.
2. Go to the **FOLDER** tab on the ribbon and to the **ACTIONS** group, click on **COPY FOLDER**.

**OR**

1. Click the right mouse button on the folder to move, choose Copy.
2. In the **COPY FOLDER** box, choose the location where the folder is to copy to, e.g. Inbox. Choose **OK**.

**OR**

1. Press [CTRL] + click and drag the folder required to the new location, e.g. Inbox.

### Deleting Folders

Folders and subfolders can be deleted from the Folder list. When deleting a subfolder, the contents of the folder are also deleted. Folders are moved to the Deleted Items folder so if a mistake is made this is where to retrieve them.

➤ **To Delete A Folder:**

**MENU**

1. Select the folder to copy.
2. Go to the **FOLDER** tab on the ribbon and to the **ACTIONS** group, click on **COPY FOLDER**.

**OR**

3. Click the right mouse button on the folder to be deleted, choose **DELETE**

- *Deleted folders can be retrieved simply by clicking and dragging the folder required from Deleted Items folder to another folder.*

### Favourite Folders

The favourites folders are merely shortcuts to your most often used folders. If like many people you have many folders holding messages from different workmates or assigned a folder based on their content such as a particular project, you may only use 4 or 5 folders on a regular basis and instead of searching all the way through your folder list to find them you can assign them to the favourites section for easy access.

➤ To Assign A Folder As A Favourite

MOUSE

1. Select the folder to assign as a favourite.
2. Go to the **FOLDER** tab on the ribbon and to the **FAVOURITES** group, click on **SHOW IN FAVOURITES** button.
3. The button will become highlighted and the folder will appear in the top left of the navigation pane in the favourites section.
  - Remember this is only a shortcut and can be removed without removing the actual folder from your mailbox

➤ To Remove A Favourite

MOUSE

1. Select the favourite to be removed then go to the **FOLDER** tab on the ribbon and to the **FAVOURITES** group, click on **SHOW IN FAVOURITES** button

The favourite will disappear.

## Public Folders

Public folders are an easy and effective way to collect, organise, and share information with others on your team or across your organisation. You can use public folders to store any type of file or Outlook item.

Use public folders to:

- *Post information on an electronic bulletin board. People who use the bulletin board can participate in online discussions. For example, a workgroup can review and provide feedback on new product ideas.*
- *Share Outlook items in a schedule, contact list, or task list. People can review information that is constantly updated. For example, you might use a company calendar folder to publicise company meetings and holidays, a group contacts folder to make information about the people who work on a project available to everyone, and a team tasks folder to help everyone keep track of work on a project.*
- *Share files. People have fast access to files created in other programs, such as Microsoft Excel or Word. For example, you might use an employee information folder to find information about company policies or a product reference folder to get product information out to everyone who needs it.*

Public folders are created and designed by administrators and others in your workgroup or organisation who have the appropriate permission. If you have permission, you can set up your own public folders and give other people permission to use them. If you want to be innovative, you can apply your own custom views, forms, custom fields, and rules to your public folders.

## Creating A Public Folder

To create a public folder, you must have permission to create folders in an existing public folder. For information about how to obtain permission, see your administrator. Apart from this it is much the same as creating any other folder.

### ➤ To Create A Public Folder:

#### MENU

1. Go to the **FOLDER** tab on the ribbon and to the **NEW** group, click on **NEW FOLDER**.
2. In the **NAME** box, type the name for the new folder.
3. In the **FOLDER CONTAINS** box, select the type of items the folder is to contain, e.g. Mail and post Items (this will be the default.)
4. In the **SELECT WHERE TO PLACE THE FOLDER** box, choose the location for the folder within the public folder lists and click **OK**.

*You can copy a private folder to a public folder to quickly start a public folder with existing items.*

## Using Public Folders

You will find all public folders in Outlook positioned under your own private mailbox.

**YOU MUST BE IN FOLDER LIST VIEW!!!** to see public folders

➤ **To Open A Public Folder:**

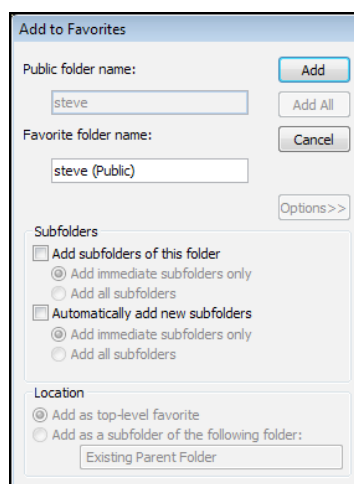

**MOUSE**

1. In the Folder List in the navigation Pane, click **PUBLIC FOLDERS**, and then click the folder you want to open.
2. If the folder you want to open is located within another folder, small triangular arrow next to each subfolder to expand them until you find the folder you want.

➤ **Add A Public Folder Shortcut To Favorites**

**MOUSE**

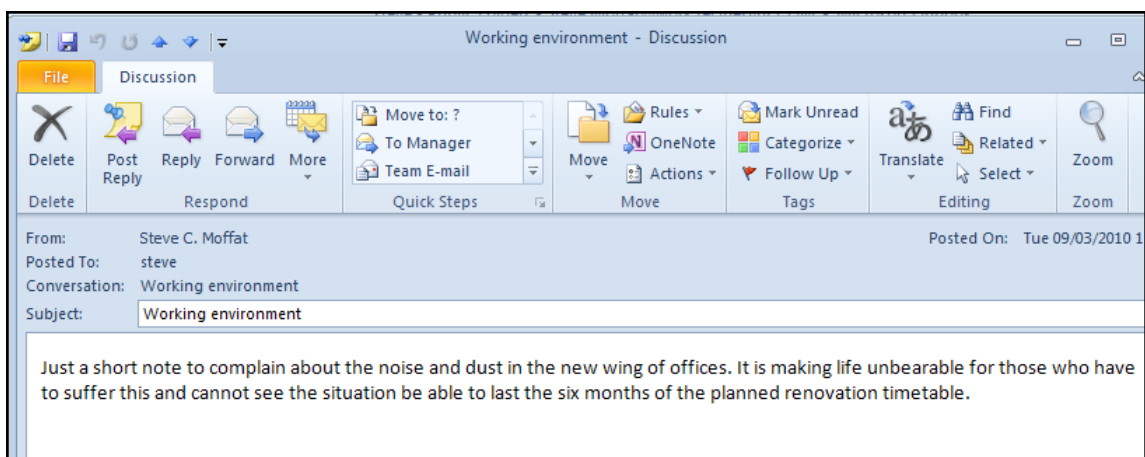

1. In the Folder List, right-click the public folder for which you want to add a shortcut, and then click **ADD TO FAVORITES** on the shortcut menu.
2. To change the name of the public folder that appears in your Favorites folder, type a new name in the Favorite folder name box.
3. To add shortcuts to subfolders of this public folder, click Options, and then select the options you want.
4. Click Add.

➤ **To Post Information In A Public Folder:**

**MOUSE**

1. Open the public folder you want to post information in.
2. To use the default form for posting information, go to the **HOME** ribbon, go to the **NEW** group, and then click **NEW POST**.
3. In the form, enter the information you want to post.
4. Click **POST**.

➤ **Reply To Information Posted In A Public Folder:**

**MOUSE**

1. Open the public folder that contains posted information you want to reply to.
2. Open the item or file you want to post a reply to.
3. To use the default form to reply to posted information, on the **DISCUSSION** tab, in the **RESPOND** group, click **POST REPLY**.
4. In the form, enter the information you want to post. Click **POST**.

➤ **Reply To The Person Who Posted Information In A Public Folder:**

**MOUSE**

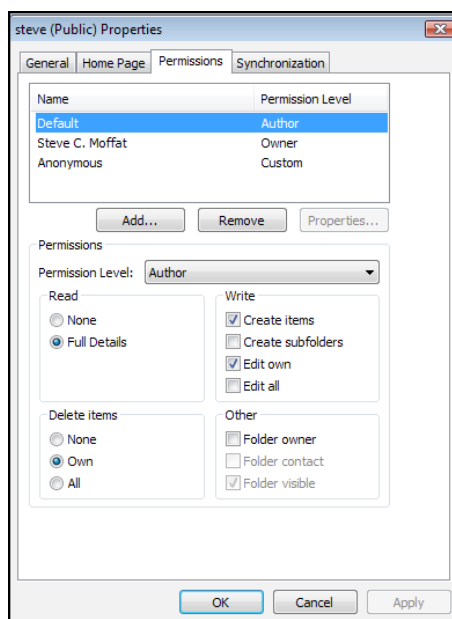

1. In the Folder List, in the navigation pane click Public Folders, and then click the folder you want to open.
2. If the folder you want to open is located within another folder, click on the small triangular arrow next to each subfolder to expand them until you find the folder you want.
3. Select the item or file you want to reply to.
4. Click Reply on the **DISCUSSION** tab in the **RESPOND** group.
5. Type your reply and click **SEND**.

## Setting Permission Levels

You must have Owner permission: With Owner permission you can create, read, modify, and delete all items and files and create subfolders. As folder owner, you can change the permission level that others have for the folder. This permission does not apply to delegates.) permission for a public folder to set sharing permissions for the folder. You can set permissions for only one folder at a time.

➤ **To Set Permission Levels:**

**MOUSE**

1. In the Folder List, right-click the public folder you want to share, and then click **PROPERTIES** on the shortcut menu.
2. Click the **PERMISSIONS** tab.
3. Click **ADD**.
4. In the Type name or select from list box, enter the name of the person you want to grant sharing permissions to.
5. Click **ADD**, and then click **OK**.
6. In the Name box, click the name of the person you just added.
7. Under Permissions, choose the settings you wish to assign this person and click **OK**.
  - *You can assign everyone who has access to the folder the same permissions by clicking Default in the Name box.*

# Section 4 Mail Messages

## Using Mail Messages

**IN ORDER TO UTILISE THE ELECTRONIC MAIL FEATURE AVAILABLE IN OUTLOOK 2010, THE USER MUST BE FAMILIAR WITH THE TERMINOLOGY USED TO DESCRIBE ITS VARIOUS ASPECT**

TERMINOLOGY	DESCRIPTION
The Global Address List	The address book that contains all user, group, and distribution list e-mail addresses in your organisation. The administrator creates and maintains this address book. The Global Address List may also contain public folder e-mail addresses.
Outlook Address Book	The Outlook Address Book is automatically created from contacts in the Contacts folder. The contacts can be people inside and outside of your organization. When you update your contacts, the Outlook Address Book is updated as well.
Contacts	This is a customisable address book best used to store personal distribution lists you frequently address messages to, such as a list of everyone on the racquetball team. Personal Address Book files have a .pab extension and can be copied to a disk.
Distribution List	A collection of user names, identified by one unique name that is used for addressing messages to group users.

## Creating Mail Messages

Outlook allows the user to compose new mail messages, send messages, receive messages and read incoming mail messages. The messages are the basic unit of communication within Outlook. A message can contain multiple items, one of which is the actual message. When composing a message, Outlook displays the Message form with an Options icon on the ribbon. The Message form is used to add message recipients, a message subject and the body of the message. The Options are used to set general, delivery and tracking options for the mail message.

Messages can be addressed to other Mail Recipients either via the Global Address List, which lists the names of the other users on an exchange network, or if the mailbox name of the recipient is known, it can be typed into the Message form. Using the Global Address List ensures that the recipient is a valid Mail Address and that the recipient's name is correctly entered. The Global Address List is created and maintained by the Mail Administrator.

Mail recipients outside the organisation would not be found in the global address list and would therefore be stored in your contacts folder within outlook, this is your Personal address book. (Outlook address book) People entered here would have to have a valid email address such as bob.smith@msn.com this type of address is an internet mail address for external communication.

➤ **To Create A Message:**

**MOUSE**

1. While in any mail Folder choose **NEWEMAIL** from the**NEW** group on the **HOME** ribbon.

**OR**

**MOUSE**

2. While in any Folder choose **NEW ITEM** from the**NEW** group on the **HOME** ribbon.
3. Select new email

**Try this...**

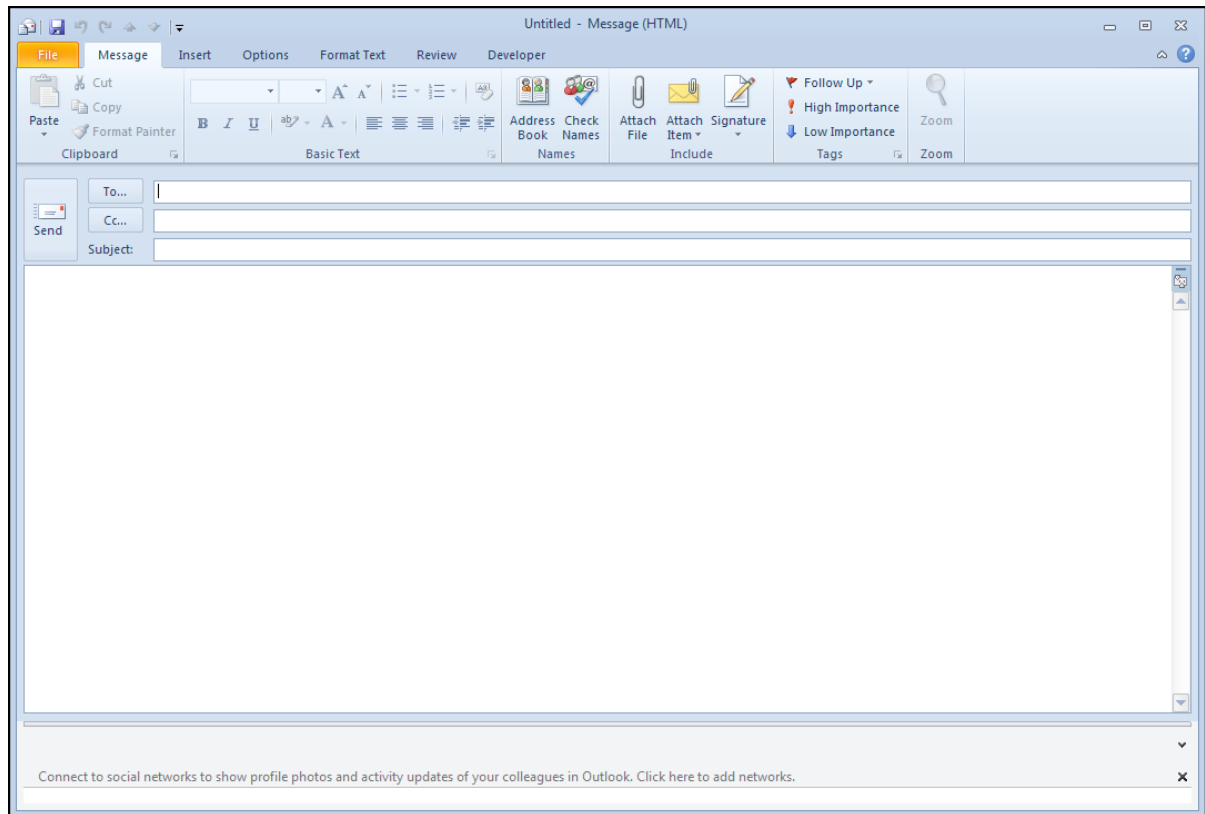

The sequence 2, 4, 6, 8, 10, 12, 14, 16, ... is the sequence of even whole numbers. The 100th place in this sequence is the number...?

Challenging? Not challenging? Try more >>

[www.alloptions.nl/life](http://www.alloptions.nl/life)

Please click the advert

4. The Message screen consists of the message ribbon and the following sections.

SECTION	DESCRIPTION
To:	Displays the main recipient(s) of the message.
Cc:	Sends a "carbon copy" of the message to the recipient(s), and the recipient's name(s) is visible to other recipients of the message.
Subject	A subject can be entered or left blank in this section. Text typed in this section is displayed in the recipient's Inbox View Pane conveying the contents and urgency of the message.
Message area	Contains the message and attachments being sent.
People Pane	The people pane is new to 2010 and shows the social connections between you and the recipients when connected to a social network site such as Facebook or MySpace, by default it is minimised.
Ribbon	The various tabs allowing formatting, insertion, and email options and access to backstage view for printing, saving and further options.

## Addressing Messages

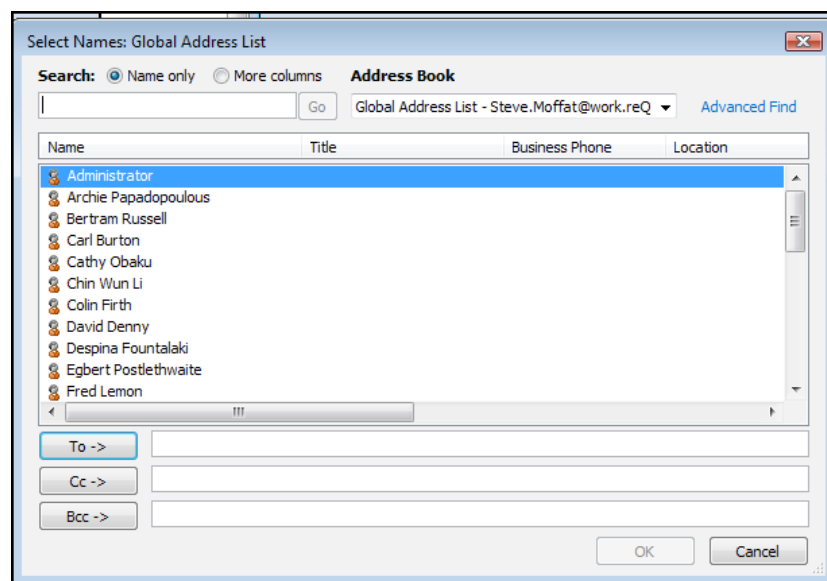

Messages can be sent to individual or multiple recipients. If the user knows the names of the recipients, they can be typed in the To box with each recipient name separated from the next by a semicolon, otherwise the user can select recipients from the Global Address List. The subject text typed is important, as this is displayed in the recipient's Inbox. Once the message has been addressed and the subject text typed, the user is then ready to type the message they require. The [TAB] key is used to move from one area to the next.

### ► To Select Names:

#### MOUSE

1. In the To box,
2. Click the **TO...** button to select Names from the address books.

3. Choose from the drop down list under address book which address book you wish to use.
4. In the List box, select the required recipient name and either double click on it or click the **TO ->** button to add the name to the recipient list. The [CTRL] key can be used to select multiple names from the list. The selected recipient name(s) will display in the **TO ->** Message Recipients box.

5. Repeat step 2 to add further recipients and change the address book displayed at the top right corner of the select names dialog box if you need to select names from a different address book.
6. Select the name(s) of the recipient(s) who are to receive a copy of the message and click the **CC** -> or **BCC** -> to add the selected names to the Cc and Bcc Message Recipients box. (The Bcc recipients will be hidden from the rest of the recipients listed when they receive the email).
7. Click **OK** to return to the message form all the selected names will be displayed in the corresponding address fields.

### OR

1. You can type the names of the recipients in the address fields, as you type, Outlook will constantly search your address books for a match and as soon as a match is found, the full name will be displayed. To accept the name displayed, press [ENTER], otherwise continue to type and press [ENTER] to separate the names with a semi colon.
2. Press [TAB] to move to Subject.
3. Type the message subject.
4. Press [TAB] to move to the Message area.
5. In the Message area, type the required message

Before you send a message, Microsoft Outlook automatically checks the names you type in the To, Cc, and Bcc boxes against the names in the Address Book and against those contact folders that you've specified as Outlook Address Books. If an exact match is found, the name is underlined. If multiple matches are found, a window will open allowing you to choose the person you wish to send to.

If multiple matches are found, and you have used the address before, the name you chose previously is displayed in the box with a green, dashed underline to remind you that there are other matches. Right-click the name to see the matches.

You can also manually check names in messages by clicking the Check Names button on the message toolbar.

### Editing Message Text

Messages can be edited using the standard Windows editing techniques. Placing the insertion point at the relevant position in the message and typing the new text can insert text. Any text to the right of the insertion point is pushed along. Selecting it and simply typing the new text can replace text. Text can be repositioned within the message by using the Cut, Copy and Paste procedures.

➤ **To Select Text:**

**MOUSE**

1. In the Message form, click and drag over the text to be selected.

➤ **To Deselect Text:**

**MOUSE**

Click away from the selected text.

➤ **To Delete Text:**

**KEYBOARD**

1. Press [BACKSPACE] to delete any characters to the left of the insertion point.

**OR**

2. Press [DELETE] to delete any characters to the right of the insertion point.

Please click the advert

➤ **To Cut, Copy And Paste Text:**

**MENU**

1. Select the text to be cut or copied.
2. Choose **CUT** from the **CLIPBOARD** group on the **MESSAGE** ribbon

**OR**

1. Choose **COPY** from the **CLIPBOARD** group on the **MESSAGE** ribbon.
2. Position the insertion point where the text is to be inserted.
3. Choose **PASTE** from the **CLIPBOARD** group on the **MESSAGE** ribbon.

**MOUSE**

1. Select the text to be cut or copied.
2. To cut the selected text, click.

**OR**

3. To copy the selected text click.

4. Position the insertion point where the text is to be inserted.
5. Click to paste the text.

**Formatting Text**

A message can be enhanced by applying formats and changing its alignment. These changes can be made in two ways, via the Format menu or using the formatting toolbar. The Formatting toolbar is used to apply the most commonly used formats.

➤ **To Format Text:**

**MENU**

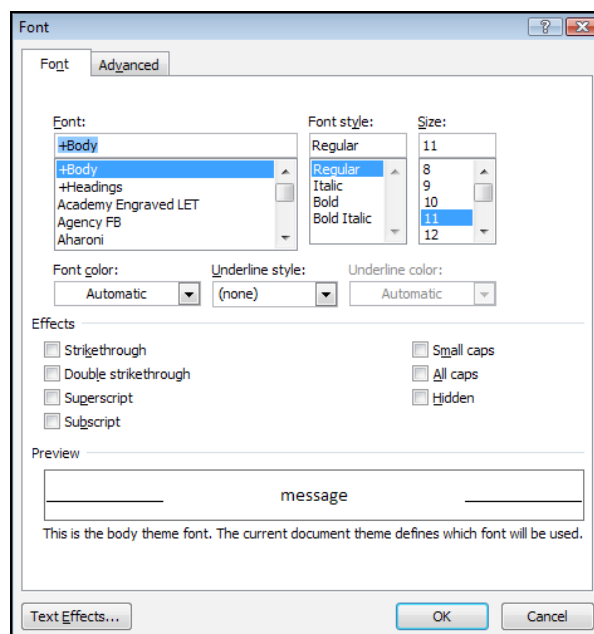

1. In the Message form, select the text to format.
2. Choose formatting options from the **BASIC TEXT** group on the **MESSAGE** ribbon.

**OR**

1. Click the right mouse button on the selected text and choose from the mini toolbar

**OR**

2. To access extra text formatting options. Click on the **DIALOG BOX LAUNCHER** to the bottom right of **THE BASIC** text group on the **MESSAGE** ribbon
3. The **FONT** dialog box displays.
4. Make the font selections you desire
5. Click **OK**

**OR**

If more advanced formatting of text is required such as you would wish to do in microsoft word then you will have to go to the format text ribbon where all formatting options as exhibited in microsoft word is available to you

Please click the advert

### Masters in Management

Designed for high-achieving graduates across all disciplines, London Business School's Masters in Management provides specific and tangible foundations for a successful career in business.

This 12-month, full-time programme is a business qualification with impact. In 2010, our MiM employment rate was 95% within 3 months of graduation\*; the majority of graduates choosing to work in consulting or financial services.

As well as a renowned qualification from a world-class business school, you also gain access to the School's network of more than 34,000 global alumni – a community that offers support and opportunities throughout your career.

For more information visit [www.london.edu/mm](http://www.london.edu/mm), email [mim@london.edu](mailto:mim@london.edu) or give us a call on **+44 (0)20 7000 7573**.

\* Figures taken from London Business School's Masters in Management 2010 employment report

➤ **To Access Advanced Text Formatting**

**MOUSE**

1. Click on the **FORMAT TEXT** ribbon at the top of the message all of microsoft word text formatting options are available to you. (see microsoft word)

<b>FONT OPTIONS</b>	<b>DESCRIPTION</b>
Font	Displays the fonts available for the current printer. Font refers to the design of the typeface.
Font Style	Displays the styles available for the selected font.
Size	Displays the available sizes of the selected font. The larger the size, the bigger the text.
Font Color	Displays a variety of colours that can be applied to the selected text.
Underline style and Underline colour	Underlines all characters, including spaces between words with a single line style with the option of selected a colour underline.
Effects	Displays a combination of effects to be applied to the selected font.

**Paragraph Alignment**

Paragraph alignment aligns selected text relative to the left and right margins. If no text is selected, the paragraph containing the insertion point (flashing cursor) is aligned.

➤ **To Align Text:**

**MENU**

1. In the Message form, select the text required.
2. From the **BASIC TEXT** group choose the alignment of text you would like

**OR**

1. Click on the **FORMAT TEXT** ribbon at the top of the message.
2. Go to the **PARAGRAPH** group
3. Use the **DIALOG BOX LAUNCHER** to access further paragraph alignments and options

OPTION	DESCRIPTION
Left	Aligns text to the left margin.
Centre	Centres text between the left and right margins.
Right	Aligns text to the right margin.
Justify	Aligns text equally between the left and right margins.
Bullet	Inserts a bullet at the left margin preceding each selected paragraph. The first line of text following a bullet is automatically indented to the first tab position.

4. Choose the required alignment.
5. Choose **OK**.

### OR

1. Select the text required.
2. Click the required alignment button from the **PARAGRAPH** group on the **FORMAT TEXT** ribbon

## Spelling And Grammar Checker

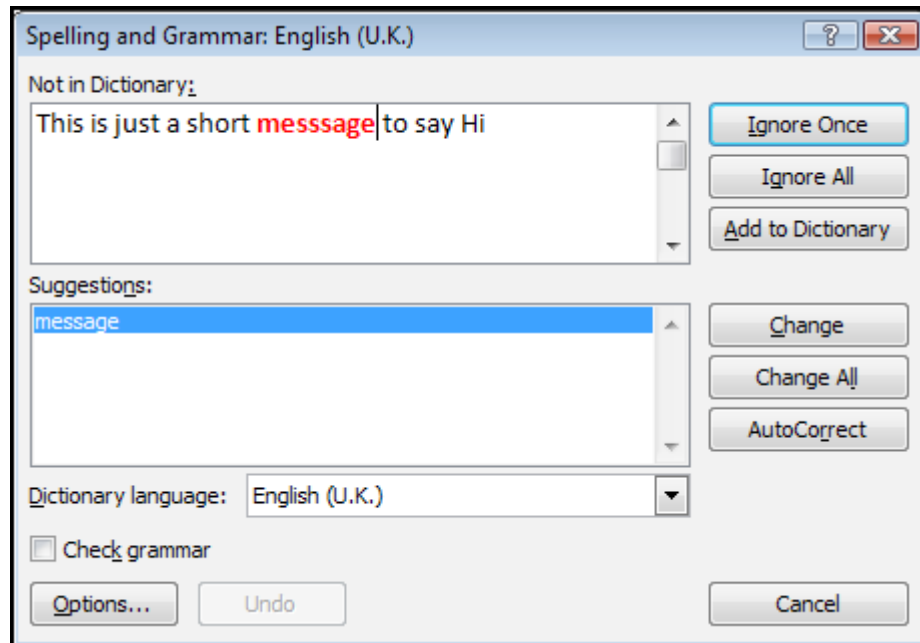

Outlook has the facility to check the spelling of any item including mail messages. When the Spell Checker is started, any incorrect spellings are highlighted and alternative suggestions displayed. The Spelling option can be set to check all messages automatically before they are sent.

### ➤ To Spell Check A Mail Message:

### MENU

3. In the Message form, choose Review ribbon, then Spelling and Grammar. The Spelling dialog box displays, highlighting the first incorrect word.

Please click the advert

You're full of *energy*  
and *ideas*. And that's  
just what we are looking for.

Looking for a career where your ideas could really make a difference? UBS's Graduate Programme and internships are a chance for you to experience for yourself what it's like to be part of a global team that rewards your input and believes in succeeding together.

4. Choose the required options.

OPTION	DESCRIPTION
Not in Dictionary	Displays the first incorrect word.
Suggestions	Lists proposed words from the dictionary.
Ignore Once	Leaves the highlighted error unchanged throughout the message.
Ignore All	Leaves all instances of the highlighted error unchanged throughout the document and continues to check the document. Word will ignore this spelling error or type of grammar error throughout the rest of the current Word session.
Add to Dictionary	Adds the highlighted word to the dictionary.
Change	Changes the word to the selected word shown in the "Change to" box. When the selected error is a duplicate word, the Change button is replaced with a Delete button.
Change All	Changes all instances of the highlighted word to the selected word in the "Change to" box.
Auto correct	Adds the spelling error and its correction to the AutoCorrect list so that Word will correct it automatically as you type.
Options	Opens the Spelling & Grammar Options dialog box, where you can open a different custom dictionary or change the rules that Word uses to check spelling and grammar.
Undo	Reverses the last spelling change.
Check grammar	Clear this check box if you don't want Word to check the grammar in the active document.

**OR**

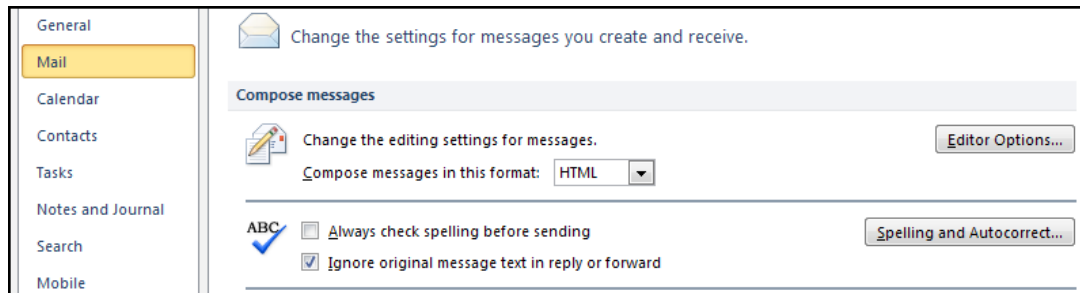

### **KEYBOARD**

1. Press [F7] then choose the required options.
2. The Spelling dialog box automatically closes on completion and a dialog box displays, confirming that the spell check is complete.

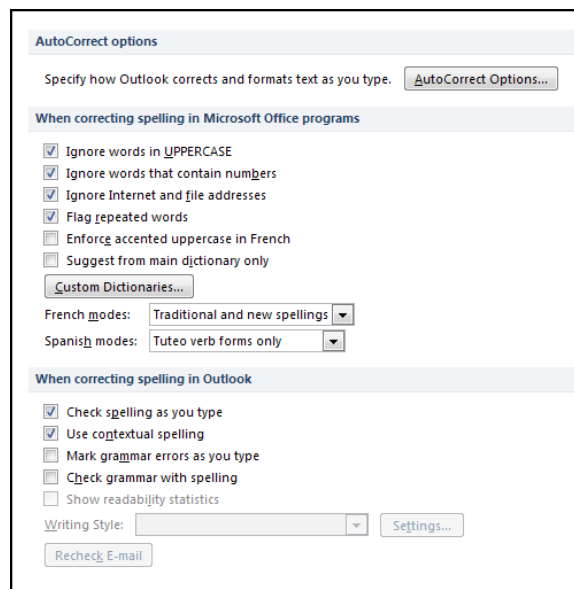

➤ **To Set Spelling Options:**

### **MENU**

1. In **BACKSTAGE** view (**FILE** tab), choose Options.
2. The Options dialog box displays. Choose the Mail button on the left.

3. Check or uncheck the 'always check spelling before sending' option.
4. Click the spelling and autocorrect... button
5. Set the required options and click **OK**.

## Sending Messages

Once the user has composed a mail message, the message can then be sent to the relevant recipients.

### ➤ To Send A Message:

#### MENU

1. Compose the message.
2. From the message in front of the to, cc buttons click the send button.
3. The message is sent to the recipients.

➤ **To View Sent Messages:**

**MOUSE**

1. In the Navigation Pane, select the Sent Items folder.
2. A list of messages sent will display in the View Pane.

### Saving Unsent Messages

Messages can be composed and saved to the Draft folder. When the message is ready to be sent, it can be opened from draft, edited and sent.

Please click the advert

Discover the truth at [www.deloitte.ca/careers](http://www.deloitte.ca/careers)

**Deloitte.**

© Deloitte & Touche LLP and affiliated entities.

Download free ebooks at [bookboon.com](http://bookboon.com)

➤ **To Save Message As A Draft:**

**MOUSE**

1. Compose the message.
2. In the Message form, Click the close button or press **ESC** to close the window and choose **YES** to save changes to the item.
3. The saved message displays in the Draft folder with a  symbol attached to it.

**OR**

1. Compose the message.
2. In the Message form, choose the **FILE** tab and **CLOSE**. Choose Yes to save changes to the item.

➤ **To Open Unsent Messages:**

**MOUSE**

1. In the Draft folder, double-click on the message to open.
2. Make any amendments to the message.
3. To send the message, click send

## Cancelling Messages

If the user chooses not to send a composed message, it is easily cancelled.

### ➤ To Cancel A Message:

#### MOUSE

4. Compose the message.
5. In the Message form, Click the close button or press **ESC** to close the window
6. Choose **NO** to save the changes to the item. The Message form automatically closes without sending or saving the message.

## Dealing with Mail Messages

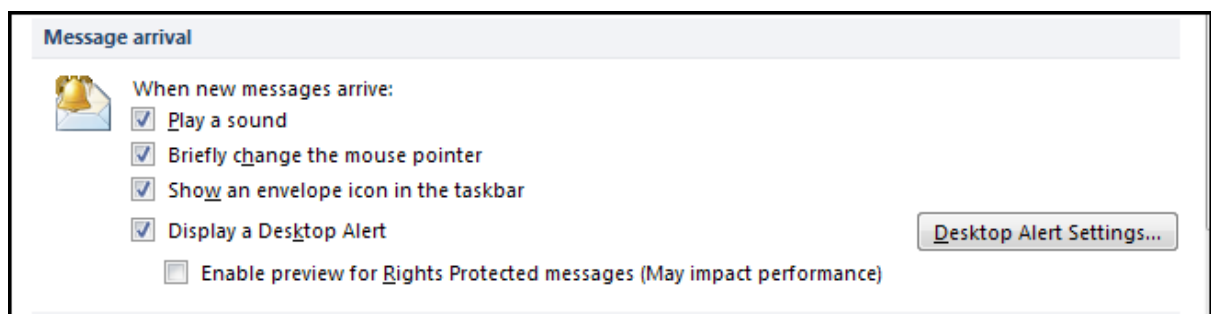

All incoming mail messages are automatically stored in the user's Inbox folder, making it easier for the user to find incoming mail. When the contents of the Inbox folder is displayed in the View Pane, column headings display informing the user of any messages that have been received. The column headings display the sender, subject details and the date and time the message was received. By default, Outlook automatically applies the Messages with AutoPreview to the Inbox. This view allows the user to see the first three lines of a message without having to physically open it.

You can get Outlook to notify you in different ways when new messages arrive

### ➤ To Notify When New Messages Arrive

#### MOUSE

1. Choose the **FILE** Tab and click **OPTIONS**.
2. Click the mail button on the left.
3. Scroll down to the message arriving section

4. Make a selection from the options on how you wish outlook to react when a new message arrives
5. Click ok to apply choices

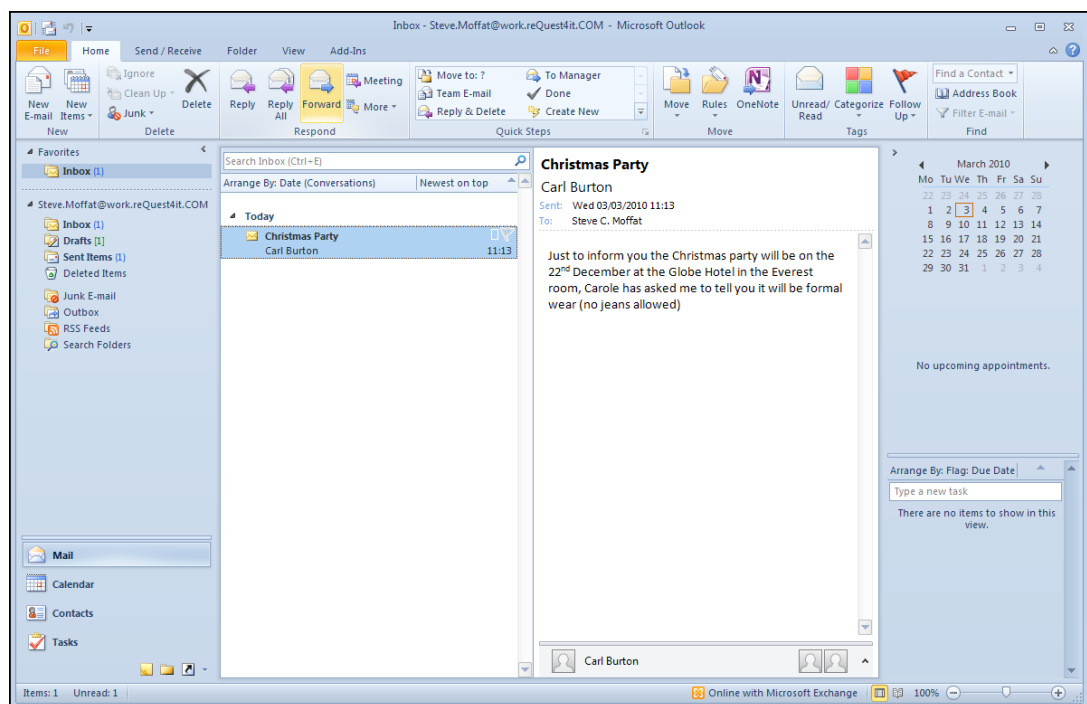

## Unread Messages

Any unread messages are displayed in bold in the View Pane. When a message is opened, it is displayed in the Message form allowing the user to view the previous or next message in the listing without going back to the Inbox.

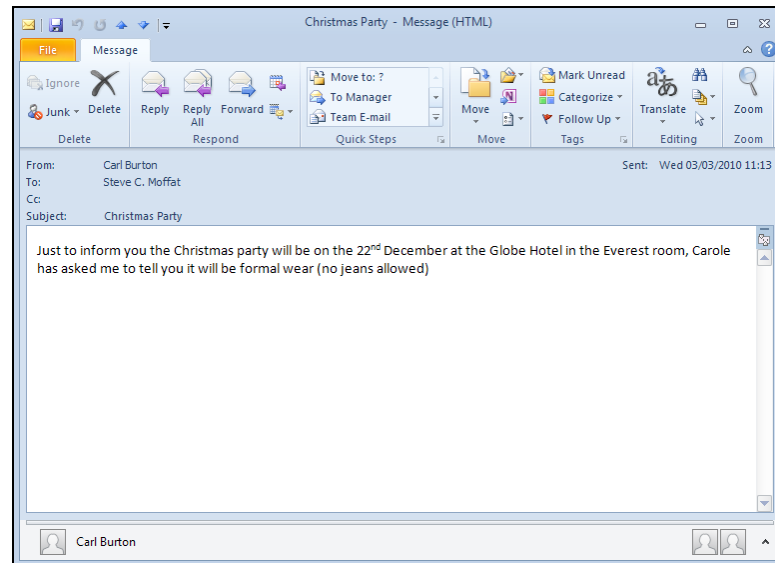

### ➤ To Open A Mail Message:

1. In the Navigation Pane, choose Inbox.
2. All messages received are displayed in the middle of the window in the View Pane.

If the reading pane is turned on the body of the message should appear to the right of the view pane.

Messages are automatically grouped under day and week headings to make it easier to find them. You can click the arrow signs next to the labels to expand and collapse the groups to show and hide the messages in them.

➤ To Read The Message

MOUSE

1. Double Click on the message.
2. The Message form opens, displaying the selected message.

## Moving Between Messages

In the Message form, it is possible to view any previous messages or messages that follow the current message without having to return to the View Pane.

### To View The Previous Message:

#### MOUSE

In the Message form, click . The previous message from the **QUICK ACCESS** toolbar.

### To View The Next Message:

#### MOUSE

In the Message form, click The  previous message from the **QUICK ACCESS** toolbar.

### To Close The Message Form:

#### MENU

1. Choose **FILE** from the tabs, then click **CLOSE**.

#### OR

#### MOUSE

1. Click the **CLOSE** button or Use the **ESC** key on the keyboard.

## Replying To And Forwarding Messages

Once a message has been read, the user can, if required, reply to just the message sender or reply to the message sender and all recipients of the original message. When replying to a message using the Reply to Sender or the Reply to All option, the reply message is automatically addressed to the originator of the message. The Reply form also displays the original message and the subject details of the message with the prefix RE:. The reply to the message can be typed above, below or in the body of the original message. Reply text is in blue by default.

We can use the respond group on the home ribbon to respond to unopened messages or if the message is open then the same respond group is available on the message tab.

➤ **To Reply To A Message:**

**MOUSE**

1. In the Inbox folder, select the message to reply to.
2. To reply to the sender, click **REPLY**

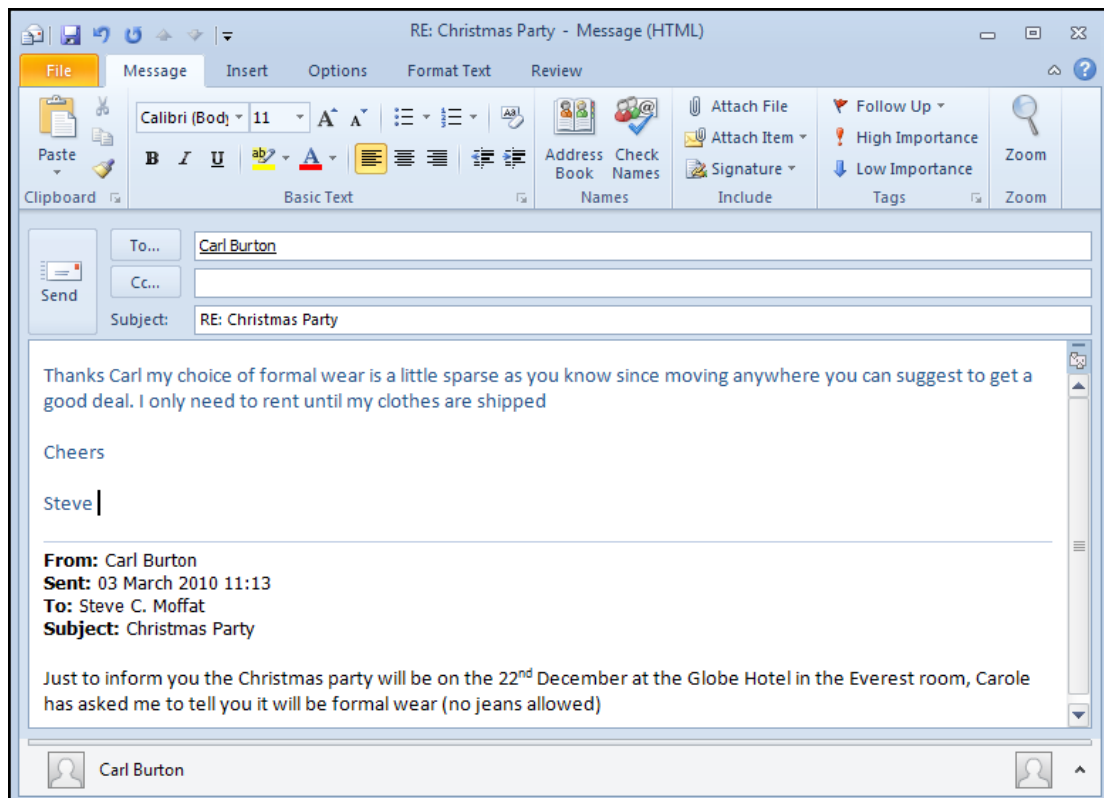

**OR**

1. To Reply to All, click **REPLY TO ALL**.
2. The RE: message form displays. Type a reply message.
3. Click **SEND**

**OR**

1. In the Inbox folder, select the message to reply to.
2. Click the right mouse button on the selected message, choose **REPLY** or **REPLY TO ALL**.
3. The RE: message form displays. Type the reply message.
4. Choose File, Send.

## Forwarding Messages

Once a mail message has been read it can be forwarded to other Mail Users. The sender's own comments can be added to the message before it is sent to other members. As with replying to messages, the subject of the original message is automatically entered in the Subject box with a prefix, in this case FW: indicating that the message is a forwarded message. When forwarding a message the original message with the address information is automatically entered in the Message area.

### ➤ To Forward A Message:

#### MOUSE

In the Inbox folder, select the required message.

1. Click the **FORWARD** button in the **RESPOND** group. The FW: message form displays.
2. Click the **TO..** button. The Select Names dialog box displays.

3. Select the names of the recipients to receive the forwarded message.
4. If required, type a message in the Message area. Click **SEND**

#### OR

1. Click the right mouse button on the selected message, choose Forward.
2. The Fw: message form displays. Follow steps **III** to **V** as mouse method.

## Inserting Data into a Message

Information can be inserted or copied into other messages. Objects and files from other Windows applications be inserted into messages.

➤ **To Copy Information Between Messages**

**MENU**

1. Open the required message to copy information from.
2. In the Message area, select the text to be copied.
3. Choose **COPY** from the clipboard **GROUP** on the **MESSAGE** tab

**OR**

1. Click the right mouse button over the selected text and choose **COPY** from the **MINI-TOOLBAR**.
2. The copied item is stored in memory.
3. Close the message.
4. Open the message to Paste the information into

**OR**

1. Compose a new message.
2. Position the insertion point in the Message area.
3. Choose **PASTE** from the clipboard **GROUP** on the **MESSAGE** tab

**OR**

4. Click the right mouse button at the desired insertion point and choose **PASTE** from the **MINI-TOOLBAR**.  
The desired text is pasted into the message.

➤ **To Copy Information From A File:**

**MENU**

1. Open the required Microsoft application and document.
2. Select the required information to be copied.
3. Choose **COPY** from the clipboard **GROUP** on the **HOME** tab
4. Close the document and application.
5. In Outlook, compose a message or open an existing message.
6. Position the insertion point in the Message area.
7. Choose **PASTE** from the clipboard **GROUP** on the **MESSAGE** tab

**OR**

8. Click the right mouse button at the desired insertion point and choose **PASTE** from the **MINI-TOOLBAR**.
9. The copied information is inserted at the insertion point.

### Attaching Files And Objects To A Message

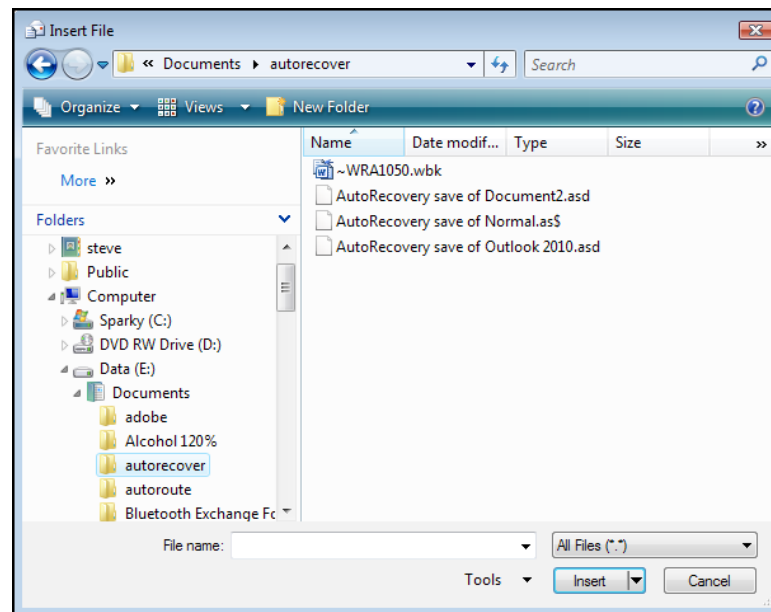

One or more files or objects can be attached to a message.

➤ **To Attach A File Or Object To A Message:**

**MENU**

1. Compose a new message or open an existing message.
2. In the Message area, **ATTACH FILE** from the **INCLUDE** group on the **MESSAGE** tab.

3. Navigate to the location of the file you wish to attach.

Do you like cars? Would you like to be a part of a successful brand?  
We will appreciate and reward both your enthusiasm and talent.  
Send us your CV. You will be surprised where it can take you.

Send us your CV on  
[www.employerforlife.com](http://www.employerforlife.com)

4. Select the folder and filename required.
5. Click on the Insert drop down arrow to select the method you want to insert the file.

6. The attached file displays in the Message header under Attached

OR

1. Compose a new message or open an existing message.
2. Go to the Insert ribbon Include group and click on **ATTACH FILE**
3. Follow steps **III** to **VI** as menu method.

### Attaching Items

An Item is an object within outlook itself such as a message a calendar appointment a task or note.

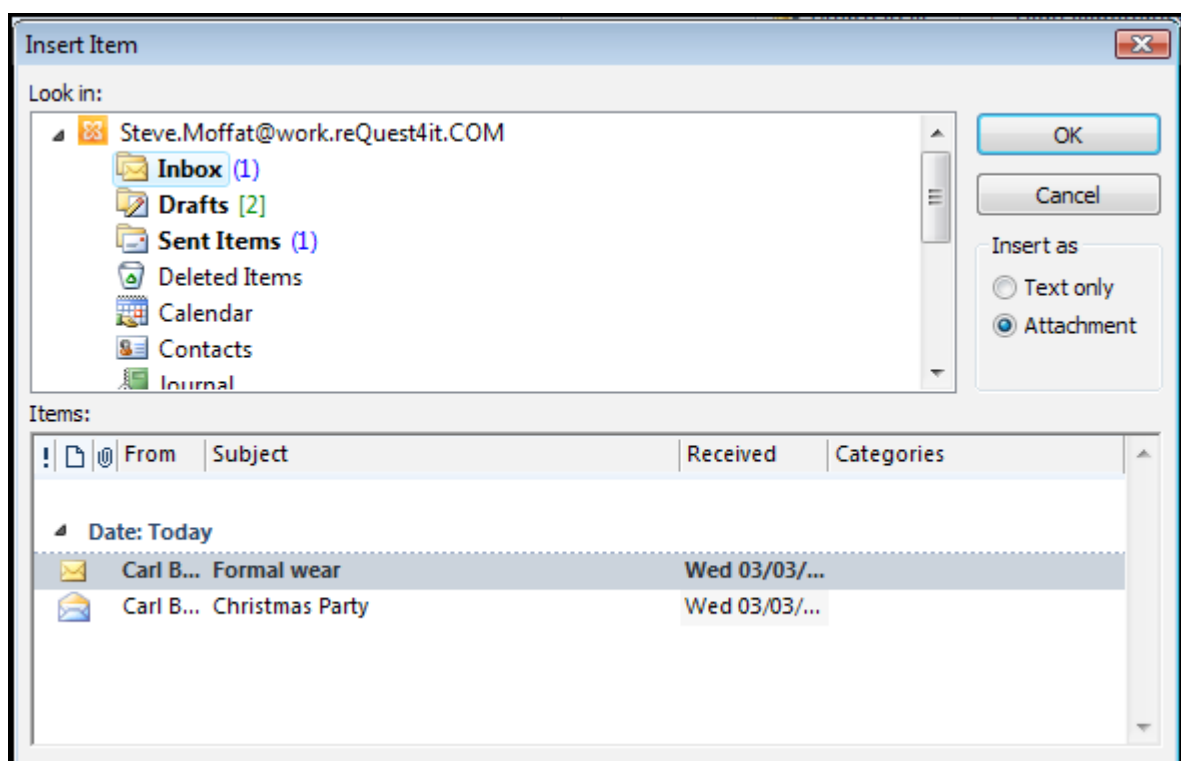

➤ **To Insert An Outlook Item In Message:**

**MOUSE**

1. Click the down arrow next to the attach item button in the include group on the message.
2. Make a selection of what type of item you wish to insert.
3. Choose outlook Item.
4. The Insert Item dialog will be displayed
5. Select the item you wish to insert and click **OK**. The item will be inserted as an attachment or text depending on which **INSERT AS** option you selected.

### Opening Attached Files:

When a message with an attachment is received, the attachment is represented in the Inbox by a paper clip. Attached files can be opened from a message as long as the corresponding application is available.

➤ **To Open An Attachment:**

#### **MOUSE**

1. Open the message containing the attachment.
2. In the Message area, double-click on the object/file icon. The application the attachment belongs to opens and loads the file.
3. When finished, exit the application in the normal way.

## Saving An Attachment

If the user wishes to keep an attached file, it can be saved to a folder or to a floppy disk.

### ➤ To Save An Attachment:

#### MOUSE

1. Open the message containing the attachment.
2. In the Message Header area, double-click on the Application icon. The application the attachment belongs to opens and loads the file.

3. Choose **FILE** from the ribbon, then **SAVE AS**.
4. Select the drive and folder to save the file to.
5. If required, type a new filename.
6. Choose **SAVE**.
7. On completion, exit the application in the usual way.

#### OR

1. Right click the attachment icon in the message header and choose **SAVE AS...**
2. Select the drive and folder to save the file to.
3. If required, type a new filename.
4. Choose **SAVE**.

## Message Options

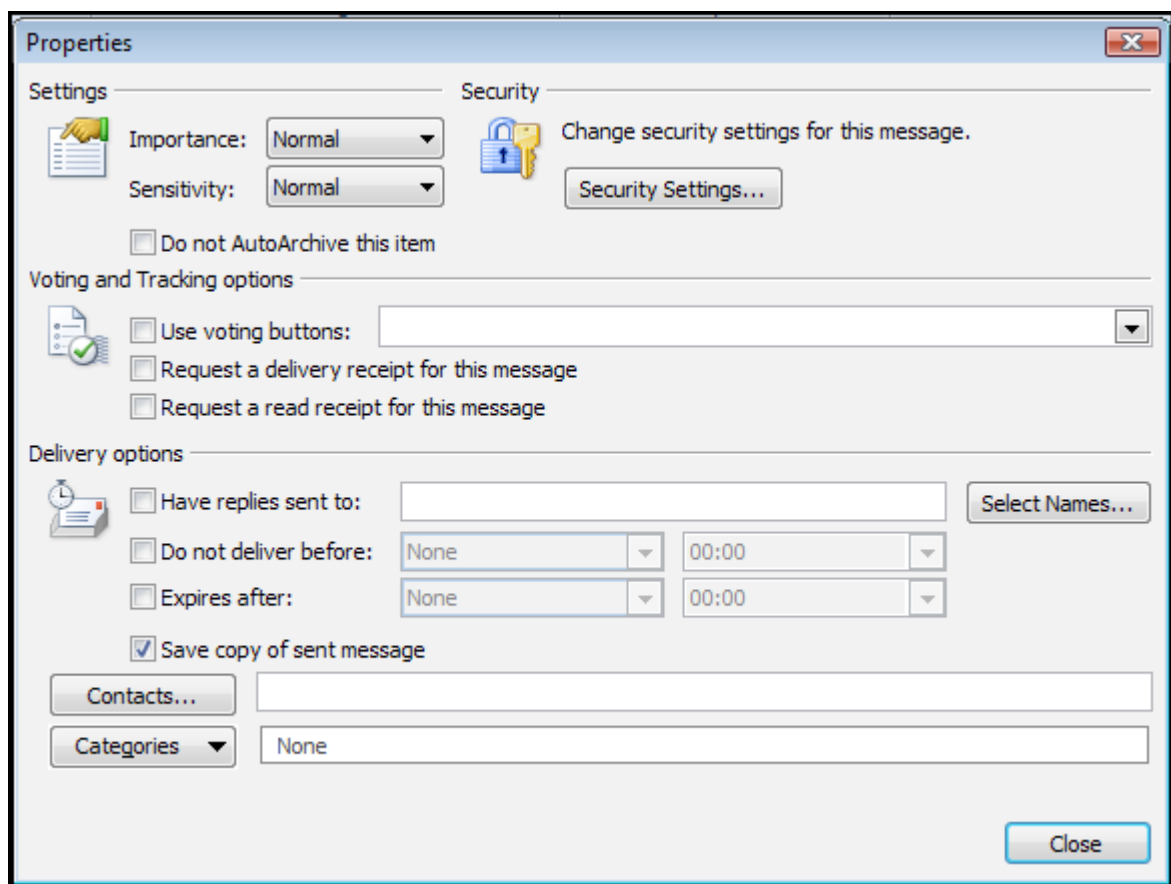

When composing a message, the user can set various message options before a message is sent.

### ➤ To Set Message Options:

#### MOUSE

1. Choose New Message and Click the **OPTIONS** tab.
2. The regular options above are displayed.
3. For further options click on a dialog box launcher in one of the groups.
4. A dialog will open with more choices for options

## Importance

Contains three levels of message importance or priority: high, normal and low. Setting message priorities affects how the message is routed from source to destination. High priority messages are routed to their destinations before normal messages, and low priority messages are transmitted last. The default setting in Outlook is normal. A symbol displays in the recipient's View Pane indicating the message importance. High displays a red exclamation mark in the recipient's Inbox, Low displays a down arrow in the recipient's Inbox. Normal messages have no symbol against them.

### ➤ Change The Importance Level

#### MOUSE

5. Click the importance drop-down arrow and select High or Low click for very important or not important.

## Sensitivity

You can mark your messages as Personal, Private or Confidential and the banner in message header will display the selected option.

### ➤ Define The Sensitivity

#### MOUSE

1. Click the sensitivity drop-down arrow and select Personal, Private or Confidential.
- *Marking a message Private prevents the message from being modified after you send it.*

## Voting Buttons

You can send out mail messages that need recipients to respond in a preset way. Microsoft Outlook calls this "voting". When you set voting options in a message, Outlook creates buttons relating to the options that you specify for the recipients to click. You can then track the results by viewing the votes.

### ➤ To Set Voting Options:

#### MOUSE

1. Select the **USE VOTING BUTTONS** check box, and then click the voting button names you want to use in the box.

- To create your own voting button names, delete the default button names, and then type any text you want. Separate the text with semicolons. For example: Small; Large; Extra Large.
2. **CLOSE AND DE-SELECT THE SAVE SENT MESSAGE TO** check box, and then enter the folder name where you want the message saved and Close.
  3. Click **SEND**.

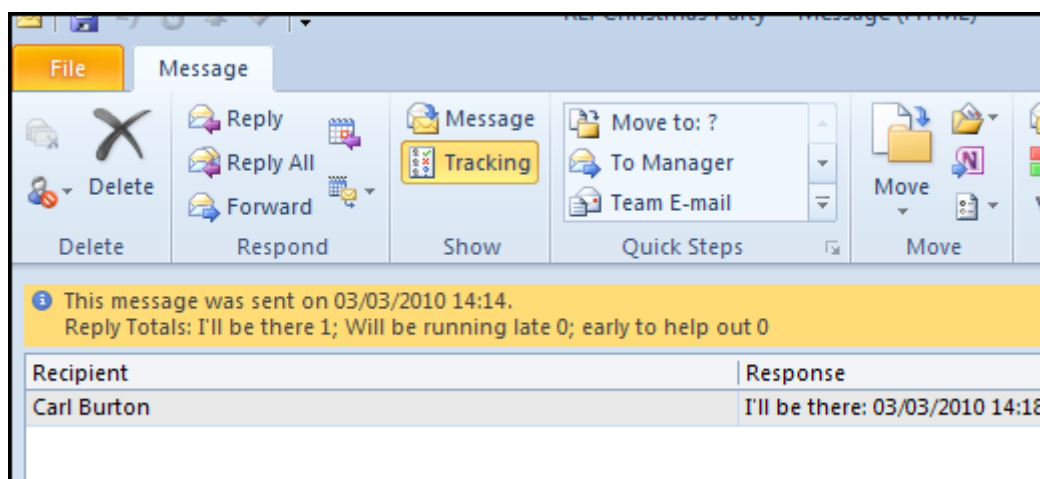

### View Vote Responses To A Message

To review the results of the voting, you use Outlook's tracking.

#### ➤ To Track Voting Responses:

#### MOUSE

4. Open the original message with the vote in it. This is usually in the Sent Items folder.

5. In the message header, click on the **INFORMATION BAR** where it states the current results of your voting and select from the option that appears **VIEW VOTING RESPONSES**.

➤ **To Copy The Results Of Voting Responses:**

**MOUSE**

1. View the voting responses.
2. Select the responses you want to copy. To select all rows, click the first row, and then hold down **[SHIFT]** and click the last row.

**OR**

3. To select nonadjacent rows, click the first row, and then hold down **[CTRL]** and click additional rows.
4. On the **CLIPBOARD** group, click **COPY**.
5. Switch to the other program or to the text box of the item you want to copy the information to.
6. On the **CLIPBOARD** group, click **PASTE**.

### Read And Delivery Receipts

Outlook can notify when messages are delivered or read by returning a message to you verifying the date and time the message arrived at the mailbox of the recipient “Delivery Receipt” or verifying the date and time the message was opened by the recipient “return Receipt”.

➤ **To Be Notified About A Message**

**MOUSE**

1. Beneath the Voting and tracking options, select the Request a delivery receipt for this message or the Request a read receipt for this message check box.

**OR**

1. On the **OPTIONS** ribbon in the **TRACKING** group make the choice there to have a read or delivery receipt by ticking the respective box.

### Have Replies Sent To

Outlook can send replies to a particular message to someone else, such as an assistant.

➤ **To Have Replies Sent To Some Body Else**

**MOUSE**

1. Check the **HAVE REPLIES SENT TO** box and type the name of the person you want to receive the reply messages in the space provided or click **SELECT NAMES** button to select the name from an address book.

**OR**

1. On the **OPTIONS** ribbon in the **MORE OPTIONS** group click on the button **DIRECT REPLIES TO** button enter or select the name you wish to enter from the properties dialog
2. Click **OK** to close and accept your selection

### Do Not Deliver Before

When used, this option keeps the message in the sender's Outbox folder until the date and time specified.

#### ➤ To Not To Deliver A Message Before A Specific Date

#### MOUSE

1. Check the Do not deliver before box and specify the date and the time when you want the message to be delivered.

#### OR

2. On the **OPTIONS** ribbon in the **MORE OPTIONS** group click on the button **DIRECT REPLIES TO** button enter or select the name you wish to enter from the properties dialog.
3. Click **OK** to close and accept your selection

## Expiry Date

This option makes the message unavailable by deleting the message after the specified date and time provided the recipient(s) has not read it.

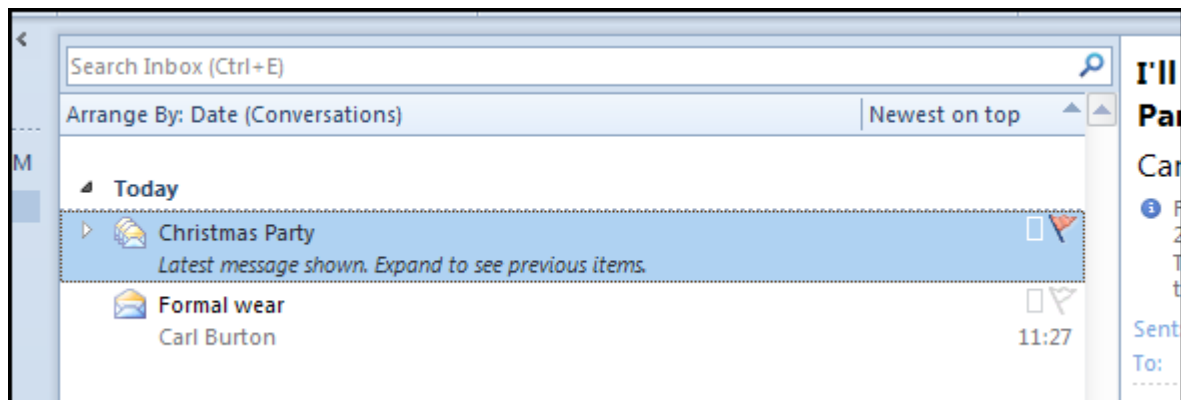

### ➤ To Set An Expiry Date

#### MOUSE

1. Check the **EXPIRES AFTER** box and specify the date and the time when you want the message to become unavailable.

## Flagging Messages

The user can flag a message to remind them to follow up the message or they can flag a message with a request for the recipient to follow it up. When a message is flagged, an icon displays in the Flag Status column of the right of the View Pane.

### ➤ To Flag A Message:

#### MOUSE

1. From the View Pane, click the **FOLLOW UP** flag in the **TAGS** group on the **HOME** ribbon
2. From the menu make a choice as to when you wish to follow this email up.

➤ **To Add A Reminder To A Flag (For Myself):**

**MOUSE**

1. Select the message you wish to flag in the view pane.
2. Click the **FOLLOW UP** flag in the **TAGS** group on the **HOME** ribbon

3. Choose **ADD REMINDER** from the menu.
4. Set the options you require in the dialog box.
5. To assign a due date to the flag, in the **DUE DATE** box select the date required.
6. Choose **OK**.

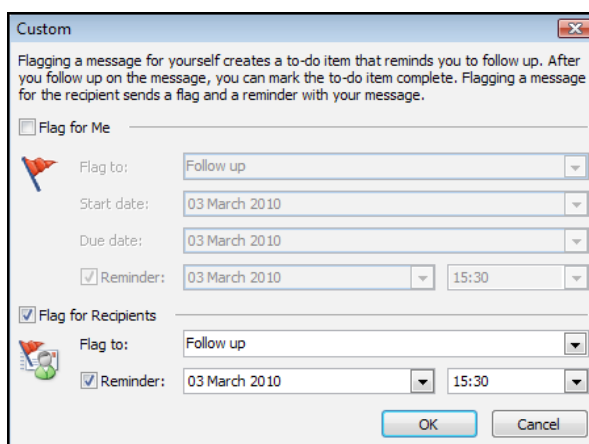

- *By default, overdue items appear in red.*

➤ **To Add A Reminder To A Flag (For Recipient):**

**MOUSE**

1. Create a new message
2. Enter message and recipients
3. Click the **FOLLOW UP** flag in the **TAGS** group on the **HOME** ribbon
4. Choose **ADD REMINDER** from the menu.

5. Untick **FLAG FOR ME** and tick **FLAG FOR RECIPIENTS**
  6. Set the options you require in the dialog box.
  7. To assign a reminder to the flag, in the **REMINDER** box select the date required and the time
  8. Choose **OK**.
  9. When the recipient receives a message with a flag, a comment on the purpose of the flag and the reminder time will appear at the top of the message.
- *By default, overdue items appear in red.*

➤ **To Flag A Message As Complete:**

**MOUSE**

1. Right-click over the flag symbol next to the message you wish to flag as complete and choose **FLAG COMPLETE** from the shortcut menu

**OR**

# Brain power

By 2020, wind could provide one-tenth of our planet's electricity needs. Already today, SKF's innovative know-how is crucial to running a large proportion of the world's wind turbines.

Up to 25 % of the generating costs relate to maintenance. These can be reduced dramatically thanks to our systems for on-line condition monitoring and automatic lubrication. We help make it more economical to create cleaner, cheaper energy out of thin air.

By sharing our experience, expertise, and creativity, industries can boost performance beyond expectations. Therefore we need the best employees who can meet this challenge!

The Power of Knowledge Engineering

Plug into The Power of Knowledge Engineering.  
Visit us at [www.skf.com/knowledge](http://www.skf.com/knowledge)

### MENU

2. Open the flagged message.
3. Click the **FOLLOW UP** flag in the **TAGS** group
4. Check **COMPLETED** and click OK.

*Completed items appear with a tick in the flag column*

#### ► To Clear A Flag:

### MOUSE

5. Right-click the flag symbol next to the message whose flag you wish to clear. Choose **CLEAR FLAG** from the shortcut menu.

### MENU

6. Open the flagged message.
7. Click the **FOLLOW UP** flag in the **TAGS** group
8. Click **CLEAR FLAG**.

### Flag Colours

By default any flag is for today, in the follow up flag options in the menu you are able to adjust that for tomorrow or next week. Etc. the flags will have different colours dependent on the option chosen.

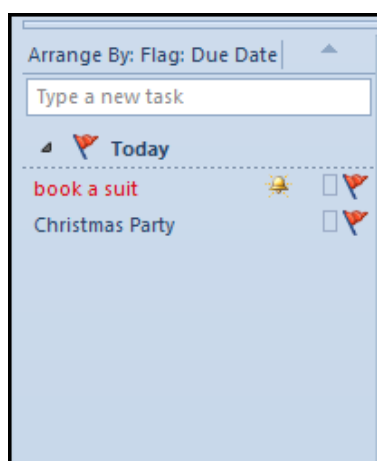

➤ **To Set Different Colour Flags For Messages:**

**MOUSE**

1. Select the message you wish to flag in the view pane.
2. Click the **FOLLOW UP** flag in the **TAGS** group on the **HOME** ribbon
3. Make a selection from the flag types and the flag will appear as before but as a specific colour.
  - *Flags of this nature are easier to group and locate within your mail folders.*

### Flags And To Do Pane

When flags are applied to emails either by yourself or the sender, an email with a flag becomes something to do. This type of email could be classed then as a task to perform at some future date. The to do pane lists all tasks within your email folders. Whether the task is an email in origin or a task in your task folders.

When you receive or create a flagged email it will appear in the to do section of the to do pane near the bottom. As you complete the tasks just left click on the flag for the task to be completed and to disappear from the to do pane.

It does not matter where you put the email in your email folders the to do pane searches for flagged emails no matter where they are in your mailbox.

### Colour Categorise Messages

Another method of helping you to be more efficient is the use of colour categories. These will enable you to colourise your emails based on certain criteria you set or for you to manually define the basis on which they are applied.

By default categories only have a colour label such as blue, red, green etc but as a colour category is first used you are asked to define the label for that particular category such as “business” or “personal” maybe a project name or such.

The categories work into all aspects of outlook, the calendar, tasks, notes etc.

➤ To Apply A Category

MOUSE

1. Select an email or several if you prefer.
2. Click on the **CATEGORISE** button in the **TAGS** group on the **HOME** tab.
3. Select a colour category.
4. If it is the first time a category has been used a window will appear asking you to rename it.

5. Enter a name and apply a shortcut cut key if you desire
  6. Click on **YES**.
  7. As you can see when the category is applied to an email a coloured square will appear next to the flag to easily identify it later and in the reading pane a coloured bar with the category label appears in the message header. (This is how it would appear in an open mail)
- *Remember categories apply to all parts of outlook we look further into categories later to enable automatic categorising.*

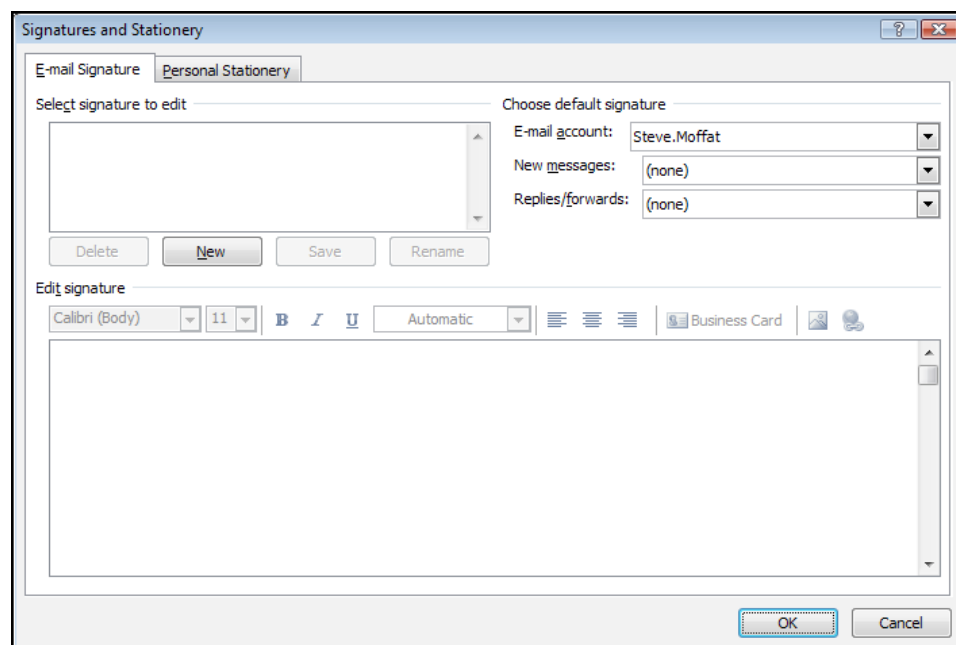

## Autosignature

An e-mail signature consists of text and/or pictures that are automatically added to the end of an outgoing e-mail message. You can create custom signatures for different types of audiences. For example, use your first name for messages to friends and family, or your full name and e-mail address for messages to business contacts. You can also use a signature to add “boilerplate” text, such as an explanation of how you want others to respond to your messages.

### ➤ Create A Signature For Messages

#### MOUSE

1. Go to **BACKSTAGE** view (**FILE TAB**) click **OPTIONS**, and then click the **MAIL** button on the left
2. On the right look down and click the **SIGNATURES** button a dialog will open.

3. To create a new signature click on the new button.
4. Under Signature, click **SIGNATURES**, and then click New.

5. In the **NEW SIGNATURE** box, enter a name. and click **OK**

6. Using the formatting tools to choose a format for your signature.
7. In the main area type the text you want to include in the signature. You can also paste text to this box from another document.
8. The formatting options will not be useful if you use plain text as your message format.
9. To add an electronic business card - vCard - to the signature, click the business card button, select a vCard from the list, or click New vCard from Contact.
10. Once you've created the signature, you can insert it in all new messages, in all messages you reply to or forward, or just in a specific message.
11. Click **SAVE** to save the signature and **OK** to close the window

➤ **To Automatically Have An Autosignature In Each Created Message.**

**MOUSE**

1. Go to backstage view (**FILE TAB**) click **OPTIONS**, and then click the **MAIL** button on the left
2. On the right look down and click the **SIGNATURES** button a dialog will open.
3. On the top right choose a signature from the drop down list for new messages

4. You may also choose one for replies and forwards. It does not need to be the same one.
5. Click ok to accept your choices and close the window
6. Creating any new message now you will see contains the signature you selected.

➤ **To Manually Insert A Signature**

**MOUSE**

1. Create an email as previously instructed.
2. Move your cursor to the location you wish to see your signature appear.
3. Go to signature in the include group on the message tab
4. Click on the drop down arrow and select the signature you wish to insert.
5. Signature is inserted.

*You may create many signatures for different occasions and recipients. You may fulfil more than one role within your company any dependent upon the occasion and recipient, you may need to have different information within your autosignature.*

## Message Icons

Each message in the View Pane contains a Message Icon, the name of the sender, the message subject and the date and time the message was received. The icon next to each message communicates information about the received message:

MESSAGE ICONS	DESCRIPTION
	High Importance Message
	Low Importance Message
	Unread Message
	Read Message
	Notification Of A Delivered Message
	Notification Of A Read Message
	Notification That A Message Was Not Delivered
	Notification That A Message Was Not Read
	Message With An Attachment

## E-mail Accounts

You can get the e-mail service you need by adding an e-mail account to Microsoft Outlook using the information provided to you by your administrator or Internet service provider (ISP). Depending on your needs, you can add several e-mail accounts to a single Outlook user profile. For example, you can add a Microsoft Exchange Server account to handle your business e-mail and then add an Internet e-mail account, such as Hotmail, to handle your personal e-mail.

Outlook Supports The Following Types Of E-Mail Servers:

- *Microsoft Exchange Server*
- *Internet E-mail: POP3, IMAP, HTTP*
- *Additional Server Types*

To Get Started With An E-Mail Account, You Need To Tell Outlook:

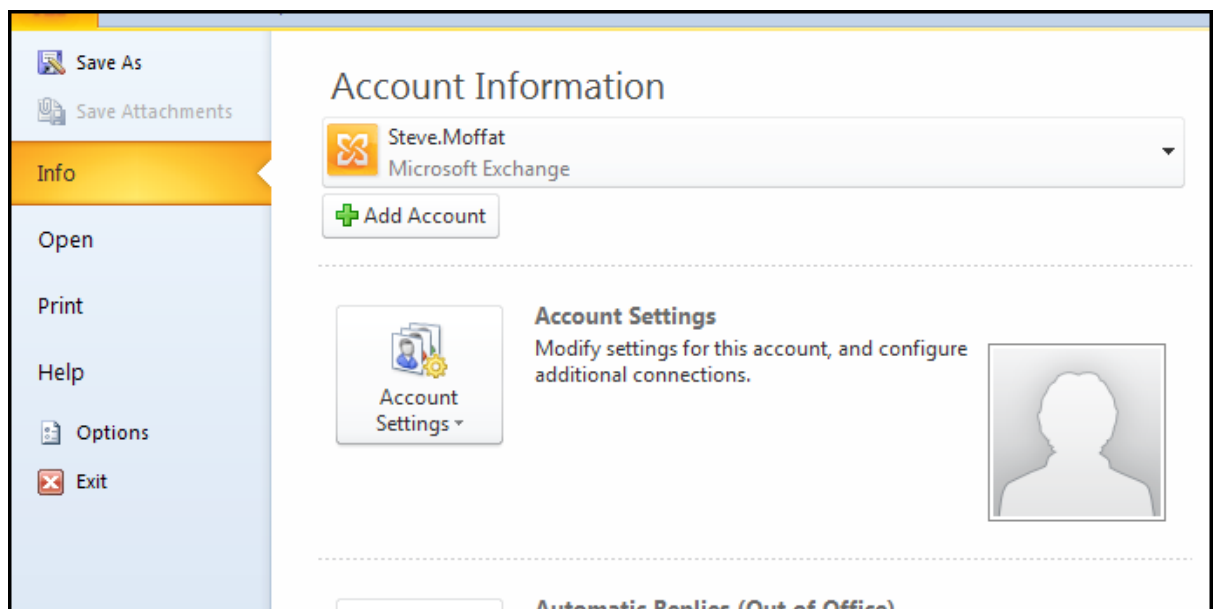

- *Type of account (Exchange Server, POP3, IMAP, HTTP, or other)*
- *Name of your incoming server and outgoing server*
- *Your user name Your e-mail address (for example: username@provider.com)*
- *Your password*

### Add An E-Mail Account (Pop3)

#### ➤ To Add An E-Mail Account

#### MOUSE

1. Go to backstage view (**FILE TAB**) click **INFO**.

2. Click **ADD ACCOUNT**
3. Enter your name.
4. Enter your email address in full.
5. Enter your password
6. Reenter your password.

**Add New Account**

**Auto Account Setup**  
Click Next to connect to the mail server and automatically configure your account settings.

☒ **E-mail Account**

Your Name:   
Example: Ellen Adams

E-mail Address:   
Example: ellen@contoso.com

Password:   
Retype Password:   
Type the password your Internet service provider has given you.

☐ **Text Messaging (SMS)**

☐ **Manually configure server settings or additional server types**

< Back   Next >   Cancel

7. When you click next outlook 2010 will automatically connect to the internet and locate your email server and port settings and set up your pop3 internet account within outlook.
8. Click NEXT
9. Test account settings to complete adding the account.

MITIGATE RISK | REDUCE COST | ENABLE GROWTH

- Unless specified by your ISP, all server and address entries are typed in lowercase letters. Some ISPs require a combination of lowercase and uppercase letters for passwords to add further security. For example, passWorD. Check with your ISP to see if it requires a case-sensitive password.
- If you want to configure additional settings, such as how you want your computer to connect to your e-mail server, click *More Settings*. Otherwise, click *Next* and click *Finish*. The new mail account will appear in the *Navigation Pane*.
- Unless your ISP has indicated that your service uses Secure Password Authentication (SPA), do not select the *Log on using Secure Password Authentication (SPA)* check box.

## Add An E-Mail Account (Exchange)

### ➤ To Add An E-Mail Account

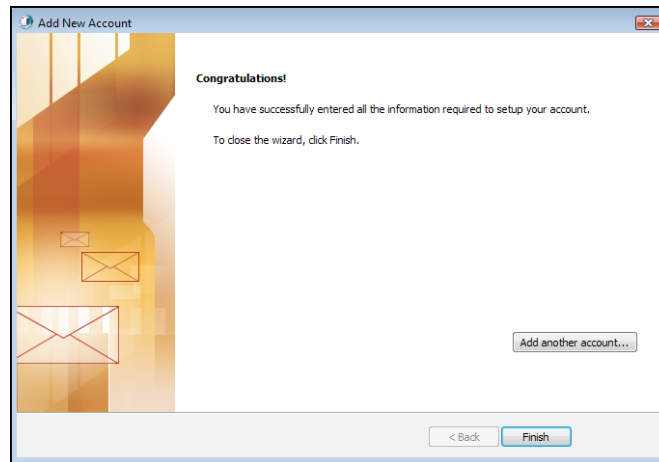

### MOUSE

1. Make sure Outlook is not running
2. Go to the **CONTROL PANEL** and double click on the **MAIL** icon.
3. Choose profiles a dialog will open
4. Add a new profile, Give the profile a name called exchange when asked, a new dialog will open.
5. Make the **MANUALLY CONFIGURE SERVER SETTINGS OR ADDITIONAL SERVER TYPES** selection.
6. Click next, select **MICROSOFT EXCHANGE OR COMPATIBLE SERVICE**.

A screenshot of the "Add New Account" dialog box in Outlook 2010. The dialog has a title bar with the text "Add New Account" and a close button. Below the title bar is a section titled "Server Settings" with the instruction "Enter the information required to connect to Microsoft Exchange or a compatible service." The main area contains two text input fields: "Server:" and "User Name:". Between these fields is a checked checkbox labeled "Use Cached Exchange Mode". To the right of the "User Name:" field is a "Check Name" button. At the bottom right is a "More Settings ..." button. At the very bottom are three buttons: "< Back", "Next >", and "Cancel".

7. Click **NEXT**, enter a server name and a user name.
- *If you are to connected constantly to the network then untick **USE CACHED EXCHANGE MODE** this would set up offline folders to be used when not connected to the network such as on a laptop.*

8. Click **CHECK NAME**.
9. You may be asked for an administrator username and password to access the server and confirm the exchange user account. If your administrator has given you a username and password to confirm this then enter and proceed.
10. The server name and username will become underlined
11. Click next to see that your email account has been created.
12. Start outlook and choose appropriate profile.

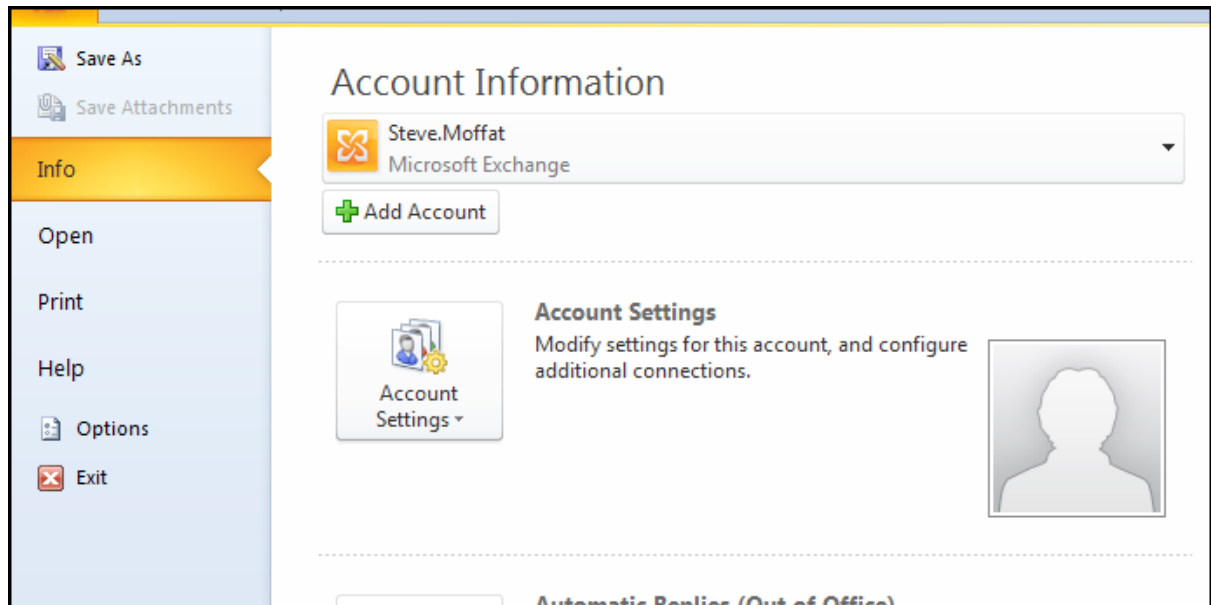

## Editing Or Removing An E-Mail Account

### ➤ To Remove An E-Mail Account

2. Click **ACCOUNT SETTINGS** and from the menu choose **ACCOUNT SETTINGS** a dialog will open.

3. Click the e-mail account you want to delete, and then click **REMOVE**.
4. Click **CLOSE**.

### Make An E-Mail Account The Default

If you are using more than one account, you can specify which account is the default so that it will be the first account to be processed. Microsoft Outlook sends your messages using the default account unless you click the Accounts button (next to the Send button) on the message to choose another account to use for that message.

#### ➤ To Make An E-Mail Account The Default

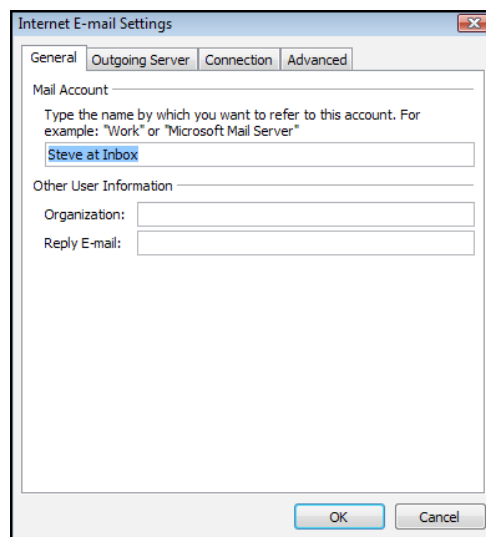

#### MOUSE

1. Go to backstage view (**FILE TAB**) click **INFO**.
2. Click **ACCOUNT SETTINGS** and from the menu choose **ACCOUNT SETTINGS** a dialog will open.
3. Click the e-mail account you wish to make the default and click **SET AS DEFAULT**.
4. Click **CLOSE**.

### Have Replies Sent To A Different E-Mail Account

You can specify a different account to be used when a recipient sends a reply to your message. For example, if you send a message and then go on holiday to visit a friend, you can tell Microsoft Outlook to send replies to your message to your friend's account.

➤ **To Have Replies To Your Messages Sent To A Different Account**

**MOUSE**

1. Go to backstage view (**FILE TAB**) click **INFO**.
2. Click **ACCOUNT SETTINGS** and choose **ACCOUNT SETTINGS** a dialog will open.
3. In the list, click the e-mail account that you send the message from, and then click **Change**.
4. Click **MORE SETTINGS**, and then, in the **REPLY E-MAIL** box, type the e-mail address of the account that you want replies sent to.

**Change An E-Mail Account Name**

An e-mail account name is the name that appears in the list of e-mail accounts you have created. If you use more than one e-mail account, when you create a new message you can click the **Accounts** button (next to the **Send** button) to see the list of accounts and choose which to use to send the message.

Please click the advert

The advertisement features a dark red background with a white central box. The RedStarResume logo is in the top left. The main text asks 'Do you want your Dream Job?' and promotes the service. A call to action button is at the bottom right, with a hand cursor pointing to it. A small note at the bottom of the button area says '(enter the discount code in the "Discount Code Box")'.
