*In conversation with  
Maggie Stables, India Fisher and Lisa Bowerman*

The beginning of 2002 saw Big Finish takes their biggest gamble with their Doctor Who range yet - six plays all closely linked, with an arc running throughout - an arc that told the story of the Eighth Doctor's discovery, and subsequent attempts at concealment, that his travelling companion, Charley Pollard should be dead. And how the fact that she was alive was causing terrible chaos throughout the web of time. Here, the authors of this arc discuss how it was all planned out and the way that their own contributions to the story came together.

### The Eighth Doctor Authors

*A conversation with  
the writers of the 2002 Eighth Doctor audios*

He's seen off Daleks, Cybermen and Yeti. He's witnessed Giant Robots running amok, met himself in the future and saved the world from the life-devouring Destroyer. He is, of course, Brigadier Alistair Gordon Lethbridge-Stewart, alias actor Nicholas Courtney.

After five decades of acting alongside far more than just the eight television Doctors (nothing compared to the likes of Frankie Howerd, Donald Wolfitt and Michael Winner), this is his story. His memoirs. His personal recollections of his life on and off the stage. Read to you by that most gentlemanly of gentlemen, Nicholas Courtney.
