

Useful Tags

**Tags for blocks of code and
simple snippets**

Choosing Your tags

- **Generic:** `<p>`, `<div>`
- **Semantic:** `<header>`, `<nav>`, `<footer>`,
`<figure>`

Block Tags

- Containers
 - `<article>`, `<aside>`, `<section>`, `<main>`, ...
- `<hr>`
- `<address>`
- `<blockquote>` - has `cite` attribute
- `<details>` with `<summary>`

Inline tags

- **** was the original inline tag for plain text
- **<cite>**
- **<abbr**
- **<time>**
- **<code>**
- **<sub>** and **<sup>**

Tags that need “more”

- `<button>`
- `<meter>`
- `<progress>`
- `<iframe>` – often used to embed documents
- `<bdo>` attribute `dir` (ltr or rtl)
- `<map>` with `<area>` -- creates “clickable element in image” but needs JavaScript

Review

- **Use the most specific tag possible**
- **Sometimes tags “don’t work”**
 - **Run your code through a validator, you may have a syntax error**
 - **Run your code in multiple browsers (good idea even if your code looks good)**
